Sub: Seeking support and collaboration from the Minister Higher Education and Technical Education for the 6th National Cyber Psychology Virtual Conference on January 22, 2022

Respected Sir,

Greetings from team Responsible Netism.

Project RESPONSIBLE NETISM is the brain child of AHAAN FOUNDATION, a trust registered in 2012. Responsible Netism (RN) is a non-profit initiative committed to the cause of child online protection initiated in Maharashtra. The movement advocates for cyber – wellness to ensure children's mental well-being in cyber space. Having successfully educated over 1.3 million children and adults since inception, we educate and empower children youth and adults about responsible online behaviour thereby equipping them to combat online distress. Responsible Netism also runs a helpline for online distress and acts as a referral organization that provides legal guidance and psychological support on online distress.

Cyber violence is the new weapon. Various forms of threats ranging from morphing, stalking, solicitation of children for sexual purposes, online grooming, have grave consequences on the victims disturbing their mental well-being. Maintaining mental well-being in cyber space is a challenge we wish to promote and advocate for, in order to build responsible netizens.

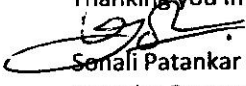

We stand against violation of cyber rights and strongly believe; it is critical to allow everyone to feel safe online. Netizen's safety rights must be protected from all kinds of abuse and violence. Setting a mission of 'Making India Cyber Safe for Children and Women', Responsible Netism a social purpose organization in association with Cyber Peace Foundation, an award-winning Cyber Security think tank, host its 6th Annual National Conference on Cyber Psychology themed "India Fights Cyber Violence against Women and Children", scheduled for Saturday, January 22, 2022.

Respected Sir, the conference is free for all, we seek kind support from the Minister Higher Education and Technical Education for the following:

1. Inviting all professors and post graduate students across Maharashtra to register for the free virtual conference on January 22, 2022.
2. Seek partnership with to collectively host the conference and share the Minister Higher Education and Technical Education logo in the collateral.

Sir, your support and guidance will be crucial toward women and child online protection. Your valuable support will enable us lay a stepping stone towards collectively making India cyber safe for children.

Thanking you in anticipation,

Sonali Patankar – 9820447887 / 9967051910

Joint Initiative of

The Responsible Netism 6th National Cyber Psychology Conference 2022 - Theme – India Fights Cyber Violence against Women and Children in collaboration with CyberPeace Foundation

Our worlds have turned digital, relying heavily on technology throughout the pandemic. Tremendous opportunities have opened doors to virtual communication and connections, and have kept us alive. Technology has empowered us significantly through these challenging times, having made us work smarter, faster, more efficiently thus increased productivity. The pandemic has indeed brought in technological transformation and has been a life-saving mechanism especially in the health sector, reaching out to the last mile. Every health-related update and its facility being just a click away has made a phenomenal impact on the way we perceive and approach health and healing.

Change requires patience, perseverance and most of all preparedness. With the digital world changing our life and working styles altogether, we seem to be ill equipped to handle the pace of technology and its entry into our lives. With its immense power technology has also increased vulnerabilities across sections and segments globally more than ever before. CYBER, is the new weapon today! Cyber Violence is violence in cyber-space that has led to violation of cyber rights of individuals, especially those of children and women. Online violence and harassment have been overlooked laying more emphasis on offline or physical violence. Cyber violence often permanently psychologically impacts victims and their families. Various forms of threats ranging from morphing, stalking, solicitation of children for sexual purposes, online grooming, have grave consequences on the victims disturbing their mental well-being. Maintaining mental well-being in cyber space is a challenge we wish to promote and advocate for, in order to build responsible netizens.

We stand against violation of cyber rights and strongly believe; it is critical to allow everyone to feel safe online. Netizens safety rights must be protected from all kinds of abuse and violence. Setting a mission to 'Make India Cyber Safe for Children and Women', Responsible Netism a social purpose organization working on child online protection and cyber wellness in collaboration with CyberPeace Foundation, an award-winning Cyber Security think tank, host its 6th National Virtual Conference on Cyber Psychology themed "India Fights Cyber Violence", scheduled for Saturday, January 22, 2022.

This free virtual conference provides a platform for stalwarts to share their wisdom and their insights on the issue of online safety and cyber violence. The conference aims at facilitating dialogues on promoting violence free technology in order to protect cyber rights of netizens, especially to build robust mechanisms to report and address online distress; thereby making India stronger and resilient in handling cyber violence. We aspire to build safe digital spaces for netizens in order to encourage positive, healthy and responsible online behaviour and inculcate cyber hygiene. This attempt would build cyber resilience against cyber violence and make India Cyber safe for children and adults.
