Semester V					
Semester No.	Course Code	Type of Course	Course Title	Credits	Hours/Week
5	MJ-301-MAA	Major Mandatory 11	Management of Agribusiness & Agri export	4	4

Course Objectives	
1	To develop understanding of the concepts, structure, and functions of agribusiness management and its role in the agricultural economy.
2	To familiarize students with agricultural marketing systems, supply chain practices, and modern marketing techniques used in agribusiness.
3	To provide knowledge about agricultural finance, rural credit institutions, and government support systems for agricultural development.
4	To enhance students' understanding of international agricultural trade, export procedures, and emerging opportunities in global agribusiness markets.

Course Outcome	
CO1	To understand the concepts, structure, characteristics, and planning process involved in agribusiness management and the application of ICT in agriculture.
CO2	To analyze agricultural marketing systems, marketing functions, types of agricultural markets, and factors affecting effective agricultural marketing.
CO3	To identify the role of various financial institutions, rural credit systems, microfinance, and self-help groups in agricultural development
CO4	To understand global agricultural trade practices, export procedures, WTO agreements, and develop basic marketing plans for Agri exports.

Unit	Title and Contents	No. of Lecture Hours
1 <b>Introduction to Agribusiness Management</b>	1.1 Agribusiness Management – Meaning, scope and importance of agribusiness in India 1.2 Structure of agribusiness 1.3 Nature and characteristics of agribusiness 1.4 Challenges and opportunities in agribusiness 1.5 Sustainable agriculture practices 1.6 Contract farming, types of contract farming 1.7 ICT in agribusiness, application of ICT in agribusiness 1.8 Farm Planning: procedure of farm planning 1.9 Agriprenurship and start-ups in agriculture 1.10 Digital transformation in agriculture	15

<p style="text-align: center;"><b>2</b> <b>Agri-Marketing and Distribution Systems</b></p>	<p><b>Agri-Marketing and Distribution Systems:</b> 2.1 Meaning and scope, importance, characteristics of agricultural products 2.2 Distribution channels in agriculture 2.2.1 Direct channels 2.2.2 Indirect channels 2.3 Supply chain management 2.3.1 Stages of supply chain management 2.3.2 Challenges of supply chain management</p>	<p><b>15</b></p>
<p style="text-align: center;"><b>3</b> <b>Agricultural Finance and Credit Systems</b></p>	<p>3.1 Meaning, nature, scope and importance of agricultural finance. 3.2 Role of agricultural finance in agribusiness and agricultural exports. 3.3 Types of agricultural credit: Short-term, medium-term, and long-term. 3.4 Sources of agricultural credit: 3.4.1 Institutional sources of credit 3.4.2 Non-institutional: Moneylenders, traders, relatives 3.5 Role of NABARD in rural and agricultural finance 3.6 Government schemes and initiatives 3.7 Microfinance and self-help groups (SHGs) in rural credit. 3.8 Export finance for agricultural products 3.9 Issues and challenges in agricultural credit system 3.10 Role of digital finance and fintech in agricultural lending</p>	<p><b>15</b></p>
<p style="text-align: center;"><b>4.</b> <b>Agri Export and International Trade</b></p>	<p>4.1 Introduction to Agri Export Management, Overview of Global Agricultural Trade 4.2 International Trade Policies and Regulations 4.3 WTO Agreement on Agriculture (AoA) 4.4 Export Documentation and Procedures 4.5 Terms of International Trade (Incoterms) 4.6 Export Finance and Payment Methods 4.7 Agri Export Zones (AEZs) in India 4.8 Role of APEDA in Agri Export Promotion 4.9 Marketing Plan for Agri Exports 4.10 Called Multiple Times, out of Service</p>	<p><b>15</b></p>

Semester V					
Semester No.	Course Code	Type of Course	Course Title	Credits	Hours/Week
5	MJ-303-MIS	Major Mandatory 13	Management Information System	4	4

Course Objectives	
1	To understand the concepts, components, and strategic role of Management Information Systems in organizations.
2	To examine the role of information systems in managerial decision making and business process integration.
3	To develop understanding of enterprise systems, business analytics, cloud computing, and digital business platforms..
4	To familiarize students with cybersecurity, data governance, ethical issues, and information security in global business.
5	To provide practical exposure to MIS applications used in modern domestic and international business organizations.

Course Outcome	
CO1	Explain the concepts, structure, and strategic importance of Management Information Systems in business organizations.
CO2	Analyze the role of MIS in managerial decision making, business intelligence, and organizational performance.
CO3	Evaluate enterprise systems, cloud technologies, analytics platforms, and digital transformation tools used in modern businesses.
CO4	Demonstrate awareness regarding cybersecurity, data ethics, digital risks, and information governance in global business operations.

Unit	Title and Contents	No. of Lecture Hours
1 Foundations of Management Information Systems	1.1 Meaning, nature, and scope of information systems 1.2 Data, information, knowledge, and business intelligence 1.3 Meaning and components of MIS 1.4 Role of MIS in functional areas of business 1.5 Strategic importance of MIS in global business 1.6 Digital transformation and business automation 1.7 Information systems for competitive advantage 1.8 Contemporary trends in MIS	15 Hours

<p style="text-align: center;"><b>2</b> <b>Decision Support Systems and Business Analytics</b></p>	<p>2.1 Managerial decision-making process 2.2 Types of decisions 2.3 Decision support systems (DSS) 2.4 Group decision support systems (GDSS) 2.5 Executive information systems (EIS) 2.6 Business intelligence and data visualization 2.7 Fundamentals of business analytics 2.8 Dashboard reporting and KPI monitoring 2.9 MIS applications in international business decision making</p>	<p><b>15 Hours</b></p>
<p style="text-align: center;"><b>3</b> <b>Enterprise Systems and Emerging Technologies</b></p>	<p>3.1 Enterprise resource planning (ERP) 3.2 Customer relationship management (CRM) 3.3 Supply chain management systems (SCM) 3.4 Cloud computing in business 3.4.1 SaaS 3.4.2 PaaS 3.4.3 IaaS 3.5 Internet of Things (IoT) and smart business applications 3.6 Artificial intelligence and automation in MIS 3.7 Blockchain applications in international business 3.8 E-Business and digital platforms 3.9 Case studies of enterprise systems used by global organizations</p>	<p><b>15 Hours</b></p>
<p style="text-align: center;"><b>4.</b> <b>Cybersecurity, Information Ethics and MIS Applications</b></p>	<p>4.1 Information Security Concepts 4.2 Types of Cyber Threats 4.3 Cybersecurity Frameworks and Risk Management 4.4 Data Privacy and Data Protection 4.5 Ethical Issues in Information Systems 4.6 Information Technology Act 2000 (Overview) 4.7 Digital Governance and Compliance 4.8 MIS Applications in different fields 4.9 Future of MIS in Global Business Environment</p>	<p><b>15 Hours</b></p>

Semester V					
Semester No.	Course Code	Type of Course	Course Title	Credits	Hours/Week
5	ME-301-POM	Major Elective	Production & Operations Management	4	4

Course Objectives	
1	To provide basic knowledge of production and operations management and its key functions.
2	To develop knowledge of different techniques of materials management, inventory management and types of maintenance management.
3	To understand the concepts relating to production planning and control
4	To understand emerging trends and modern technologies in production and operations management for improving efficiency, quality, and decision-making in manufacturing industries.

Course Outcome	
CO1	Understanding of the basic concepts and functions of production and operations management.
CO2	Apply inventory models and techniques of materials management, inventory management and understand the importance of maintenance management
CO3	Understand production planning and control techniques and their application
CO4	Students will be able to explain and apply concepts of automation, industry 4.0, AI, lean manufacturing, and six sigma in production and operations management.

Unit	Title and Contents	No. of Lecture Hours
1 Fundamentals of Production and Operations Management	1.1 Meaning, definition, objectives and scope of production and operations management, classification, evolution from manufacturing to operations management 1.2 Waste management - 3 R's (Reduce-Reuse-Recycle), scrap and surplus disposal, salvage and recovery 1.3 Plant location: Definitions, objectives and importance of plant location, locating foreign operations facilities, location decision process 1.4 Plant layout - Definition, objectives and importance of plant layout, layout planning, principles of layout, types of layout	15

<p style="text-align: center;"><b>2</b> <b>Materials and Maintenance Management</b></p>	<p>2.1 Introduction, definitions and scope of materials management  2.2 Material handling principles and practices  2.3 Criteria for selection of materials, material handling equipment, standardization, codification and simplification  2.4 Inventory control  2.4.1 ABC analysis  2.4.2 HML analysis  2.4.3 VED analysis  2.4.4 SDE analysis  2.4.5 GOLF analysis  2.4.6 SOS analysis  2.4.7 MNG analysis  2.4.8 FSN Analysis  2.4.9 XYZ Analysis  2.5 Stock levels, EOQ Model, JIT Technique  2.6 Maintenance management - Definition, objectives, types</p>	<p style="text-align: center;"><b>15</b></p>
<p style="text-align: center;"><b>3</b> <b>Production Planning and Production Control</b></p>	<p>3.1 Production planning: Meaning, objectives, scope, importance  3.2 Procedure of production planning, elements of production planning  3.3 Production schedule master production schedule  3.4 Production control: Meaning, objective, importance, factors affecting production control  3.5 Elements of production control- Dispatching, follow up, inspection, corrective action</p>	<p style="text-align: center;"><b>15</b></p>
<p style="text-align: center;"><b>4.</b> <b>Introduction to Emerging Trends in Production and Operations Management</b></p>	<p>4.1 Introduction to emerging trends: Meaning, impact of globalization, competition, and technology on operations  4.2 Automation and smart manufacturing: Need and types of automation in production, benefits and limitations of automation.  4.3 Industry 4.0: Concept, features, cyber physical systems (CPS), Internet of Things (IoT), applications in manufacturing industries.  4.4 Artificial Intelligence (AI) and machine learning in operations: Meaning, predictive maintenance, demand forecasting and robotics  4.5 Lean Manufacturing and six sigma - Concept and importance in quality improvement</p>	<p style="text-align: center;"><b>15</b></p>
