**BO-1.1 : Cryptogamic Botany (Bryophytes and Pteridophytes)**  
**(2013 Pattern) (Credit System) (Semester - I)**

*Time : 3 Hours]*

*/Max. Marks : 50*

*Instructions to the candidates:*

- 1) Answer any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat diagram wherever necessary.

**Q1)** a) Give contributions of any bryologist from India. [4]

b) Describe sporophytes in Anthocerotales. [4]

c) Mention any four biological importance of bryophytes. [2]

**Q2)** a) Explain in brief origin of pteridophytes. [4]

b) Write on morphology of sporophyte in Equisetum. [4]

c) Comment on apospory in bryophytes. [2]

**Q3)** a) Describe evolution of sporophyte in bryophytes. [4]

b) Give an account of apogamy in pteridophytes. [4]

c) Enlist any four characters of Lepidocarpon. [2]

**Q4)** a) Give affinities of bryophytes with pteridophytes. [4]

b) Write brief account of Marsileales. [4]

c) Comment on Rhynia. [2]

**Q5)** a) Give classification of pteridophytes as per sporne (1975). [5]

b) How bryophytes acts as an indicators of water and air pollution? [5]

**Q6)** a) Comment on life cycle of Lycopodium. [5]

b) Describe morphology of sporophytes in Takakiales. [5]

**Q7)** a) Give distinguishing characters of sphagnales and polytrichales. [5]

b) Write morphology of gametophytes in Ophioglossum & Osmunda. [5]

**Q8)** a) Explain morphology & anatomy of sporophytes in salviniales. [5]

b) Discuss vegetative reproduction in bryophytes. [5]

*Instructions to the candidates:*

- 1) Answer any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat labelled diagram wherever necessary.

- Q1)** a) Give the structure and functions of phytochrome. [4]  
b) Explain mechanism of electron transfer system in mitochondria. [4]  
c) Comment on competitive inhibitors. [2]
- Q2)** a) Write on metabolic changes occur during fruit ripening. [4]  
b) Discuss synthesis of carbohydrates. [4]  
c) What is nitrogen fixation? [2]
- Q3)** a) Write on factors affecting enzyme activity. [4]  
b) Give the mechanism of lipid oxidation. [4]  
c) Write on biological clock. [2]
- Q4)** a) Explain DNA biosynthesis and metabolism. [4]  
b) Discuss Michaelis-menton equation. [4]  
c) Give applications of grain moisture meter. [2]
- Q5)** a) Explain C<sub>4</sub> pathway and their types. [5]  
b) Comment on soil plant atmosphere continuum (SPAC). [5]
- Q6)** a) Discuss cyanide resistance pathway in plants. [5]  
b) Give the structure and properties of proteins. [5]
- Q7)** a) Explain mechanism of pigments synthesis. [5]  
b) Comment on pectin synthesis and breakdown mechanism. [5]
- Q8)** a) Discuss nitrogen uptake and NOD factor [5]  
b) Write on light harvesting complexes. [5]

*Instructions to the candidates:*

- 1) Attempt any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat labeled diagrams wherever necessary.

**Q1)** a) What is epistasis? Explain mechanism of gene interaction in epistasis. [4]

b) Explain various types of mutations. [4]

c) Give applications of Genetic markers. [2]

**Q2)** a) Explain lysogenic cycles in phages. [4]

b) Describe method of induction of mutations in crop plants. [4]

c) What is nullisomic aneuploids? [2]

**Q3)** a) Comment on chloroplast gene inheritance mechanism in Mirabilis jalapa. [4]

b) Describe ordered tetrad analysis in Neurospora. [4]

c) What is Pseudoallele? [2]

**Q4)** a) Comment on plant breeding work in India. [4]

b) Write on Robert-sonian translocation [4]

c) What is continuous variation? [2]

**Q5)** a) Give the role of polyploidy in crop improvement. [5]

b) Write on structure & organization of eukaryotic chromosome. [5]

**Q6)** a) Explain quantitative inheritance of cob length in zea mays. [5]

b) What is transposition? Write on inducing transpositions. [5]

**Q7)** a) Explain different methods of microbial genetic transformation. [5]

b) Describe selection method in asexually propagated crops. [5]

**Q8)** a) Give the role of karyotype in plant species identification. [5]

b) Comment on cytoplasmic male sterility in plants. [5]

[Max. Marks : 50

Instructions to the candidates:

- 1) Attempt any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat labelled diagram must be drawn wherever necessary.

**Q1)** a) Write about any four histochemical techniques with suitable examples. [4]

b) Write principle & applications of IR spectroscopy. [4]  
c) Enlist the basic components of column chromatography. [2]

**Q2)** a) Explain principle & applications of affinity chromatography. [4]

b) Write about DNA microarray technique. [4]  
c) What is the difference between magnification & resolution. [2]

**Q3)** a) Describe the principle of NMR spectroscopy. [4]

b) What is isoelectric focussing? write its principle & uses. [4]  
c) Enlist the factors affecting centrifugation. [2]

**Q4)** a) Write principle & working of digital pH meter. [4]

b) Describe basic components of light microscope. [4]  
c) What is radioactive decay? [2]

**Q5)** a) Give comparative account of different microtomes. [5]

b) Write a note on gas chromatography technique. [5]

P.T.O.

- Q6)** a) Discuss about electrophoresis of proteins. [5]  
b) Enlist any five radioisotopes used in biological sciences. Write their properties. [5]
- Q7)** a) Give an account of instrumentation of UV-visible spectrophotometry. [5]  
b) Describe Maxam - Gilbert's DNA sequencing method [5]
- Q8)** a) Write a note on ELISA technique. [5]  
b) Explain principle & working of phase contrast microscopy. [5]

- 1) Attempt any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat labeled diagrams, wherever necessary.
- 4) Figures to the right indicate full marks.

**Q1)** a) Define cell theory & Explain cell structure. [4]

b) Explain ultrastructure of golgi complex. [4]

c) What is sympatric speciation. [2]

**Q2)** a) Describe Miller's experiment on abiotic synthesis of organic matter. [4]

b) Give the structure of Glyoxysomes & Peroxisomes. [4]

c) Hardy-Weinberg Law. [2]

**Q3)** a) Explain cell aging and cell senescence. [4]

b) Explain role of cell signaling in biotic & abiotic stress. [4]

c) Define parapatric speciation. [2]

**Q4)** a) Explain the phases of cell cycle. [4]

b) Give ultrastructure & role of Lysosomes. [4]

c) What are Microfilaments? [2]

**Q5)** a) Explain biogenesis and structure of Mitochondria. [5]

b) Give role of cyclins & protein kinase in cell cycle. [5]

**Q6)** a) Discuss spontaneity of mutations. [5]

b) Write a note on origin of new genes & proteins. [5]

**Q7)** a) What is Apoptosis? Explain the Mechanism of Apoptosis. [5]

b) Discuss RNA world theory. [5]

**Q8)** a) Describe the structure and organization of flagella. Give its role in motility. [5]

b) Explain in detail “Geological time scale”. [5]

- 1) *Attempt any five questions.*
- 2) *All questions carry equal marks.*
- 3) *Draw neat labeled diagrams wherever necessary.*

**Q1)** a) State the impact of environmental pollution with respect to air. [4]

b) Comment on ecological limits. [4]

c) Define Ecosystem. [2]

**Q2)** a) Explain in marine ecosystem. [4]

b) Give an account adaptive responses of plants. [4]

c) What is edge effect? [2]

**Q3)** a) Write on photoinhibition. [4]

b) Comment on soil nutrients. [4]

c) What is Endemism? [2]

**P.T.O.**

**Q4)** a) Comment on species diversity. [4]

b) Explain plant distribution with respect to migration. [4]

c) What is allogenic succession? [2]

**Q5)** a) Comment on Hydroseres. [5]

b) Give floristic regions of India. [5]

**Q6)** a) Write a note on population size. [5]

b) Explain “Diversity types”. [5]

**Q7)** a) Comment on effect of light on distribution of vegetation. [5]

b) Write a note on “Energy flow”. [5]

**Q8)** a) Give an account of types of soil. [5]

b) Describe vegetation belts of world. [5]

- 1) Answer any five questions.
- 2) Figures to the right indicate full marks.
- 3) Draw neat and well labelled diagrams wherever necessary.

**Q1)** a) Give general characters of Pteridospermales. [4]

b) Comment on morphology of Cycadales sporophytes. [4]

c) Write on alpha and omega taxonomy. [2]

**Q2)** a) Write systematic position of Aristolochiaceae. [4]

b) Comment on classification of spermatophyta as per Engler. [4]

c) Give general characters of Welwitschiales. [2]

**Q3)** a) Write on cladistics in taxonomy. [4]

b) Give phylogeny of Urticaceae. [4]

c) Comment on Cycadeoidea. [2]

**Q4)** a) Give general characters and affinities of Coniferales. [4]

b) Give an outline of Cronquist system of classification. [4]

c) What is endemism? [2]

**Q5)** a) Describe male and female strobili of Pentoxylon. [5]

b) Explain categories and ranks in systematics. [5]

*P.T.O.*

**Q6)** a) Comment on sporophytes and gametophytes of Ephedrales. [5]

b) Write inter-relationships and economic importance of Magnoliaceae. [5]

**Q7)** a) Give affinities of angiosperms with pteridophytes. [5]

b) Comment on Post-Darwinian system of classification of angiosperms. [5]

**Q8)** a) Give general characters of Gnetales. [5]

b) Describe phytogeographic regions of India. [5]

- 1) Attempt any five questions
- 2) All questions carry equal marks.
- 3) Neat labelled diagram must be drawn wherever necessary.

**Q1)** a) Explain extrinsic factors affecting plant development. [4]

b) Give an account of monocot embryo development. [4]

c) Explain the term determination. [2]

**Q2)** a) Discuss on hormonal control in plant development . [4]

b) Give source, method of cultivation of grapes. [4]

c) What are seed dormancy? What are causes for it. [2]

**Q3)** a) Give an account of vegetative development. [4]

b) Comment on development of female gametophyte. [4]

c) Write on apical dominance. [2]

**Q4)** a) Explain importance of light mediated signaling during plant development. [4]

b) State source and economic importance of eucalyptus oil and ginger. [4]

c) What is chemotropism? [2]

**Q5)** a) Explain the process of organ development. [5]

b) What is apomixis? Give an account of apomixis. [5]

- Q6)** a) What is anther and pollen culture explain its role in understanding plant development. [5]  
b) Comment on rubber industry. [5]

- Q7)** a) Give an account of coordinated development. [5]  
b) Explain molecular genetics of gametophytic development. [5]

- Q8)** a) Write on “ megasporogenesis”. [5]  
b) Give source and method of cultivation of strawberry. [5]

- 1) Answer any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat & labelled diagrams wherever necessary.

**Q1)** a) Give an account of method of beer production. [4]

b) Comment on distribution of economically important algae in India. [4]

c) Enlist environmental implications of fossil fuel. [2]

**Q2)** a) Give the difference between management & administration. [4]

b) Describe method of bioethanol production from Lignocellulose. [4]

c) Mention microbial strain used in fermentation. [2]

**Q3)** a) Discuss the process of liquid seaweed fertilizers preparation. [4]

b) Comment on traditional fungal foods. [4]

c) What is NABARD ? [2]

**Q4)** a) Comment on methanogenesis from agro industrial residues. [4]

b) Elaborate the concept of entrepreneur w.r.t. characteristics & functions. [4]

c) What is algal technology? [2]

**P.T.O.**

**Q5)** a) Discuss resource potential of algae w.r.t. food & feed. [5]

b) Comment on process of project identification & selection. [5]

**Q6)** a) Explain distillation to dehydration process of bioethanol production.[5]

b) Write on production of Dhingri mushroom. [5]

**Q7)** a) Comment on business w.r.t. objectives & scopes. [5]

b) Discuss bacterial & viral biopesticides. [5]

**Q8)** a) Describe the process of lipid derived biofuels. [5]

b) Comment on sources & method of production of cephalosporins. [5]

**Q1)** a) Give an account of Bessey's system of classification of fungi [4]  
b) Explain Plasmodiophoromycota. [4]  
c) What are Labyrinthulomycota. [2]

**Q2)** a) State any four ecological groups of fungi. [4]  
b) Comment on fungal growth. [4]  
c) Describe any two sexual spores in fungi. [2]

**Q3)** a) Discuss Hemiascomycetes. [4]  
b) Explain relationship of fungi with plants and animals [4]  
c) Write the concept of Biohydrometallurgy. [2]

**Q4)** a) Give an account of chytridiomycota. [4]  
b) Why fungi are model organisms for genetical studies. [4]  
c) Mention contributions of Anton Debaray. [2]

**Q5)** a) Explain Trichomycetes. [5]  
b) How Gasteromycetes are interesting fungi. [5]

- Q6)** a) What are Deuteromycota? Add a note on conidiogenesis. [5]  
b) Comment on different aspects of lichens. [5]
- Q7)** a) Discuss in detail ruderal and stress tolerant strategies in fungi. [5]  
b) Describe various aspects of smut fungi. [5]
- Q8)** a) Explain sporangia to conidial evolution in Mucorales. [5]  
b) Give an account of Tinea and its clinical aspects. [5]

- 2) All questions carry equal marks.
- 3) Draw neat labelled diagram whenever necessary.

**Q1)** a) Describe silent features of Gentianacere. Describe floral variation in it. [4]  
b) Comment an Cladistic and Cladogram [4]  
c) What is genetic variation. [2]

**Q2)** a) Explain serological data is useful in solving taxonomic problem. [4]  
b) Explain RAPD technique used in taxonomy. [4]  
c) Write on parsimony analysis. [2]

**Q3)** a) Discuss SEM and TEM studies in systematics. [4]  
b) What is Numerical Taxonomy? Give its merits, demerits and applications. [4]  
c) What is L/O pattern. [2]

**Q4)** a) Describe wood elements in detail. Justify their importance in taxonomy. [4]  
b) Comment on role of catkin inflorescence in taxonomy. [4]  
c) Write briefly on xerophytic adaptations. [2]

P.T.O.

- Q5)** a) Explain the concept of speciation [5]  
b) Comment on scope & limitations of cytobotany. [5]

- Q6)** a) Discuss systematic position of Dioscoreaceae. [5]  
b) What is plastids? Describe their role in classification of higher taxa. [5]

- Q7)** a) Describe the role of proteins in taxonomy. Add a note on techniques of protein electrophoresis. [5]  
b) State different criteria for use of chemicals in plant taxonomy. [5]

- Q8)** a) Describe phytogeographical regions of the world. [5]  
b) Give Phylogeny & Economic importance of Pandanaceae [5]

- 3) Neat labelled diagrams must be drawn wherever necessary.

**Q1)** a) Write on chlorophyll fluorescence kinetics [4]  
b) What is photoperiodism? Comment on SDP with its examples [4]  
c) Give role of auxin in plants. [2]

**Q2)** a) Describe the role of respiration in plant carbon balance. [4]  
b) Comment on role of growth regulators in plant growth. [4]  
c) What is mineral assimilation. [2]

**Q3)** a) Give significance of cyanide resistance pathway [4]  
b) Explain the role of microbes in availability of nutrient [4]  
c) What is vernalization. [2]

**Q4)** a) Comment on relative growth in plants [4]  
b) Write physiology of seed germination [4]  
c) Describe role played by ethylene in fruit ripening. [2]

P.T.O.

**Q5)** a) Explain CAM pathway in aquatic plants [5]

b) Discuss factors influencing transport of water [5]

**Q6)** a) Describe the physiological traits for improving of crop. [5]

b) Give an account of strategies developed by plants for conservation of water [5]

**Q7)** a) Comment on acidosis metabolism during fruit development and seed germination [5]

b) Discuss relative growth rate and net assimilation rate [5]

**Q8)** a) Explain the biosynthesis of any one secondary metabolites [5]

b) Give an account of signal cell C<sub>4</sub> photosynthesis [5]

b) Comment on seed health testing methods. [4]

c) What is seed? [2]

**Q3)** a) Describe classes of seeds. [4]

b) Give economic impact of seed borne diseases. [4]

c) What is artificial Seeds? [2]

**Q4)** a) Give an account of maintenance of breeders seed in self pollinated crops. [4]

b) Comment on specific gravity separator. [4]

c) What is ISTA? [2]

**P.T.O.**

**Q5)** a) Write note on ELISA. [5]

b) Describe preventive measures of seed deterioration. [5]

**Q6)** a) Comment on relation of insects and plants. [5]

b) Explain integrated management of seed borne diseases. [5]

**Q7)** a) Give an account of minimum seed certification standards. [5]

b) Discuss packing and handling of seeds. [5]

**Q8)** a) Describe seed germination tests. [5]

b) Give construction and working of Pre-cleaners. [5]

[Total No. of Pages :2

**M.Sc.-II**

**BOTANY**

**BO-3.50: Advanced Biodiversity**

**(2013 Pattern) (Special) (Credit System) (Semester - III)**

*Time : 3Hours]*

*/Max. Marks : 50*

*Instructions to the candidates:*

- 1) Attempt any five questions.
- 2) All question carry equal marks.
- 3) Neat labelled diagrams must be drawn wherever necessary.

**Q1)** a) Describe bryophyte diversity w.r.t. species, habit, habitat, and distribution at taxonomic level. [4]

b) Explain the perspectives and importance of biodiversity. [4]

c) Comment on allozymes. [2]

**Q2)** a) Write on gymnosperm diversity w.r.t. habit, habitat and evolutionary success at taxonomic level. [4]

b) Describe in brief about species richness and species abundance. [4]

c) Comment on classification of ecosystems. [2]

**Q3)** a) Explain in brief identification of diversity hotspots. [4]

b) Discuss diversity indices based on species. [4]

c) Give the factors affecting ecosystem degradation and loss. [2]

**Q4)** a) Give role of national parks in situ conservation. [4]

b) Write on chipko movement. [4]

c) Comment on conservation of genetic diversity. [2]

**P.T.O.**

**Q5)** a) Write on endemism and Biodiversity. [5]

b) Give common features of threatened species. [5]

**Q6)** a) Discuss loss of Agrobiodiversity. [5]

b) Comment on global distribution of biodiversity. [5]

**Q7)** a) Give role of educational institutes in biodiversity conservation. [5]

b) Mention factors affecting species distribution. [5]

**Q8)** a) Explain the role of biotechnology in assessment of biodiversity. [5]

b) Comment on seed banks and test-tube gene banks? [5]

[Total No. of Pages : 2

**M.Sc. - II**

**BOTANY**

**BO- 4.1 : Computational Botany**

**(2013 Pattern) (Semester -IV) (Credit system)**

*Time : 3 Hours]*

*[Max. Marks : 50*

*Instructions to the candidates:*

- 1) Answer any five questions.
- 2) All questions carry equal marks.
- 3) Draw neat and labelled diagrams wherever necessary.

**Q1)** a) Calculate mean, mode, median from given data

32, 35, 31, 34, 32, 37, 34, 38, 33, 34, 33, 35, 37 [4]

b) Give an account of types of correlation [4]

c) Write on Hypothesis [2]

**Q2)** a) What is Bioinformatics? Comment on databases. [4]

b) Write on Haemocytometry. Mention its role [4]

c) Differentiate between molarity and molality [2]

**Q3)** a) Discuss in detail principles of field designs [4]

b) What is sampling? Describe various methods of sampling [4]

c) Write on variance and co-variance (Cv) [2]

**Q4)** a) What is Normality? How much NaOH is required to prepare 500ml of 0.1 N NaOH [4]

b) Write a note on BLAST [4]

c) What is a buffer? Give one example. [2]

**P.T.O.**

**Q5)** a) In a monohybrid cross Mendel crossed yellow seeded variety of Pisum sativum with Green seeded variety. F<sub>2</sub> progenies are segregated in 84 yellow and 16 green seeds. By using  $\chi^2$ - test find out does the results agree with expected ratio at 5% level of significance. [5]

b) Explain multiple sequence alignments [5]

**Q6)** a) What is pH? Explain methods of pH measurement. [5]

b) Write on Kurtosis. Explain different types of Kurtosis [5]

**Q7)** a) Explain Randomized Block Design (RBD) and its advantages. [5]

b) Write various methods of preparation of media [5]

**Q8)** a) Differentiate between parametric and non parametric tests [5]

b) Comment on Man-whitney U-Test [5]

**BOTANY**

**BO - 4.2 : Plant - Organism Interactions  
(2013 Course) (Credit System) (Semester - IV)**

*Time : 3 Hours]*

*/Max. Marks : 50*

*Instructions to the candidates:*

- 1) Attempt any five questions.
- 2) All questions carry equal marks.
- 3) Neat labelled diagrams must be drawn wherever necessary.

**Q1)** a) Explain any two parasitic plant-plant association.

- b) Give an account of grazing animals-plant Interactions.
- c) Write briefly on endophytic fungi.

**Q2)** a) Describe any two carnivorous plants in detail.

- b) Comment on allelopathy.
- c) What is mimicry?

**Q3)** a) How genetic engineering acts as tool for improving tolerance against herbivores?

- b) Discuss various aspects of epiphytic plants.
- c) Comment on algae-coral association.

**Q4)** a) Explain competitive mechanisms in plants.

- b) Describe insect-fungal symbiosis.
- c) Briefly write on Thermogenesis.

**Q5)** a) Write on ectomycorrhize and ectendomycorrhizae with examples.

- b) Discuss forms of lichens.

- Q6)** a) Describe with examples contrivances for self pollination.  
b) Comment on interactions in plant and nodulating bacteria.

- Q7)** a) What is cross pollination? Write characteristics of cross pollinated plants.  
b) How fruit and seed morphology relevant to animal dispersal mechanism.

- Q8)** a) Explain co-evolution of pollinator and plant flower structure.  
b) Describe types of endomycorrhizae citing examples.

**(2013 Pattern) (Semester-IV) (Credit System)**

*Time : 3 Hours]*

*[Max. Marks : 50*

*Instructions to the candidates:*

- 1) *Attempt any five questions.*
- 2) *All questions carry equal marks.*
- 3) *Neat labelled diagrams must be drawn wherever necessary.*

**Q1)** a) Explain the concept of plant disease epidemiology. [4]

b) Give an account of biochemical defence in plants. [4]

c) Write the names of two viral diseases with their causal organisms. [2]

**Q2)** a) Give an account on the role of temperature and humidity in disease development. [4]

b) What is disease cycle? Differentiate between penetration and infection. [4]

c) Write on tyloses. [2]

**Q3)** a) Give an account of physiological specialization and adaptation of fungi to different hosts. [4]

b) Comment on symptoms of plant diseases. [4]

c) Enlist enzymes and toxins in plant diseases. [2]

**P.T.O.**

- Q4)** a) Write notes on vertical and horizontal resistance in plants. [4]  
b) Give an account on the pathogenicity of necrotrophic pathogens. [4]  
c) Explain plant disease forecasting. [2]
- Q5)** a) Describe the role of biotechnology in plant pathology. [5]  
b) Comment on post harvest diseases of fruits and vegetables. [5]
- Q6)** a) Discuss the breeding methods for improving resistance in plants. [5]  
b) Give an account of classification of plant diseases. [5]
- Q7)** a) Describe any two methods for assessment of plant disease. [5]  
b) Comment on the chemical control of plant diseases. [5]
- Q8)** a) Give an account of biological and chemical activators of resistance in plants. [5]  
b) Write an pathogenesity and avirulence gene. [5]
