[5328] - 11
M.A./M.Sc.
GEOGRAPHY
Gg - 101 : Principles of Geomorphology
(2008 Pattern) (Semester - I)

Time : 3 Hours]

Instructions to the candidates:
1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Define geomorphology and write a review on its historical development.

Q2) Give an account of ‘sea floor spreading’.

Q3) Describe epiorogenetic and orogenetic movements.

Q4) Define and compare various processes of denudation.

Q5) ‘Drainage basin as a geomorphic unit’. Discuss.

Q6) Give a brief account of ‘slope morphology’.

Q7) Write notes on any two:
   a) Ergodic Principle.
   b) Peneplanation.
   c) Biological weathering.
Q1) Distinguish between weather and climate. Discuss the nature of tropical climatology.

Q2) Explain vertical structure of atmosphere based on temperature change.

Q3) Describe latitudinal and seasonal variations of insolation.

Q4) Give an account of the distribution of surface pressure.

Q5) Explain tricellelar model of general circulation of the atomosphere.

Q6) Define humidity and discuss its methods of measurement. Explain the factors affecting condensation.

Q7) Write notes on any two:
   a) Environmental lapse rate.
   b) Types of fronts.
   c) Methods of weather forecasting.
Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
4) Use of map stencils is allowed.

Q1) Explain the recent trends in economic geography.

Q2) Describe the homestead economy with suitable examples.

Q3) Bring out the importance of resources in economic development.

Q4) Discuss the importance of variations in cost of transportation in manufacturing.

Q5) Critically examine Myrdal’s model of economic development.

Q6) Explain the various factors influencing international trade.
Q7) Write notes (any two)
   a) Types of hypothesis.
   b) Von thunen’s model.
   c) Privatisation in India.
Q1) Give an account of evolution of population geography.

Q2) Explain the factors affecting distribution of human settlements.

Q3) Discuss various patterns of settlements with examples.

Q4) Explain Christaller’s Theory with applications.

Q5) Describe the factors influencing urban growth with examples.

Q6) Discuss Demographic Transition model with its concept, scope and application.

Q7) Write notes on any two:
   a) Socio-economic factors of dispersion of settlements.
   b) Effect of climate on distribution of population.
   c) Population as a resource.
Q1) a) Write a note on discrete and continuous data. [6]
b) Calculate kurtosis for the given data and comment on the results. [14]

Q2) a) Explain the measurement scales in statistics. [6]
b) During the last 1000 years a station had experienced 12 earthquakes. Using appropriate probability distribution, find the probability that in the next 100 years the station will be struck by:

i) At least 11 earthquakes.

ii) Almost 5 earthquakes

iii) Less than 8 earthquakes

iv) 7 earthquakes [14]
Q3) a) Describe the standard error estimates of mean and standard deviation. [6]

Q7) Write notes (any two):  

a) Properties of normal probability distribution.  
b) Degree of freedom.  
c) Trends and periodicity in time series data.
Q1) Give an account of ‘Morphogenetic regions’.

Q2) Give an account of solubility and mobility of minerals in the tropics.

Q3) Describe various clay minerals found in tropical environment.

Q4) Give an account of Indurated laterites, their properties and its world distribution.

Q5) Give an account of distribution of laterites in India.

Q6) Give an account of domed and boulder inselbergs.

Q7) Write notes (any Two):
    a) Landform development on laterite.
    b) Morphology of planation surface.
    c) Tropical rivers.
Q1) Explain the procedures of observing, reporting, collecting and displaying system of weather data by India meteorological services.

Q2) Explain the life cycle of tropical cyclones with the help of diagrams.

Q3) Write an account of profile, formation and decay of hurricanes in details.

Q4) Explain the types of airmasses of Asia and describe the types of fronts.

Q5) What are western disturbances? Explain life cycle of wave cyclones in details.

Q6) Explain the types of precipitation in details.

Q7) Write notes on any two:
   a) Medium range forecasting.
   b) Classification of clouds.
   c) Benefits of weather forecasting in marine activities.
Q1) Explain in brief various approaches to the study of agricultural geography.

Q2) Elaborate the significance of agriculture in world region.

Q3) Describe the influence of economic and technological factors on agriculture.

Q4) Explain in detail plantation agriculture.

Q5) Bring out the salient features of agriculture in semi-arid regions.

Q6) Explain the contribution of Whittlesey in agricultural regionalization.

Q7) Write notes (Any Two):
   a) Regional approach to the study of agricultural geography.
   b) Land holdings in India.
   c) Significance of land use Surveys.
Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Give an account of recent trends in population geography.

Q2) Critically evaluate Marx’s population theory.

Q3) Explain in detail population policies in India.

Q4) Describe the importance of population projections in planning and development.

Q5) Discuss the Lee’s theory of migration.

Q6) Bring out the levels and trends of fertility in terms of educational and rural status.

Q7) Write notes (Any Two):
   a) Age composition of population.
   b) Density of population.
   c) Laws of migration.
Q1) Write an account of the history of GIS.

Q2) Explain the various spatial data models used in GIS.

Q3) Explain the process of digitization and describe various types of digitizers.

Q4) Describe the various tasks of GIS.

Q5) What do you understand by DBMS? Discuss various advantages of DBMS.

Q6) Describe query analysis in GIS with suitable examples.

Q7) Write notes (any two):
   a) Objectives of GIS.
   b) Operations from Set Theory.
   c) Spatial Information Theory.
Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencil is allowed.

Q1) Write in detail about Horton’s Laws of drainage composition.

Q2) ‘Shear stress and stream power play a vital role in open channel hydraulics’. Discuss.

Q3) Explain the capacity and competence of river with reference to sediment entrainment and transport

Q4) Describe various parameters of channel cross section with suitable diagram

Q5) Describe various erosional features in the course of a river.

Q6) Define river metamorphosis. Explain long term and short term adjustments of river.

Q7) Write notes (any two):
   a) Belt - of - no - erosion.
   b) Meandering channel pattern.
   c) Types of fluvial Erosion.
Instructions to the candidates:
1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Define monsoon climatology and give an account of the development of monsoon climatology.

Q2) Explain the aerological and Fohn’s concept of origin of monsoon.

Q3) Give an account of monsoon of East and south Asia.

Q4) Explain the driving mechanism of annual cycle of summer monsoon.

Q5) Give an account of onset and withdrawal of monsoon.

Q6) Give an account of monsoon depression and easterly Jet.

Q7) Write notes (any two):
   a) Winter monsoon.
   b) ENSO indicators.
   c) Role of ocean and upper atmosphere in teleconnection.
Instructions to the candidates:
1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Explain the importance of manufacturing in regional economies.
Q2) Explain the concept of centralisation and decentralisation and their characteristics.
Q3) Critically examine the application of Losch’s Model.
Q4) Discuss the changing pattern and distribution of automobile industry.
Q5) Give an account of any two industrial regions of Anglo America.
Q6) Discuss the nature of industrial regions in India.
Q7) Write notes (any two):
   a) Agglomeration of industries.
   b) Changing pattern of chemical industry.
   c) Nature of software industry.
Instructions to the candidates:

1) Attempt any four questions
2) All questions carry equal marks
3) Use of map stencils is allowed

Q1) Describe the evolution of settlements in different parts of the world
Q2) What is nucleation? Describe the factors of nucleation of settlements.
Q3) Critically examine Ricardo’s Theory.
Q4) Explain the concepts of centrality and hierarchy of rural service centres.
Q5) Discuss the causes and consequences of rural-urban migration.
Q6) Discuss the land use and transportation as significant aspects of rural development planning.
Q7) Write notes (any two):
   a) Economic organization within villages
   b) Physical factors affecting rural house types
   c) Settlement patterns in Maharashtra
Instructions to the candidates:
1) Attempt any four questions
2) All questions carry equal marks
3) Use of map stencils is allowed

Q1) Give an account of primary & secondary data sources in Geoinformatics?

Q2) Give historical perspective and development of remote sensing at national and international level.

Q3) Discuss interaction of EMR with atmosphere and surface

Q4) Explain Geometric characteristics of aerial photograph

Q5) What do you understand by Geo synchronous and sunsynchronous satellites? Explain the utility of sunsynchronous satellites.

Q6) Discuss various factors governing the interpretability of satellite images.

Q7) Write notes (any two):
   a) Spectral signatures
   b) Components and types of 4ps signals
   c) Scanning sensors
GEOGRAPHY
Gg - 301 : Theoretical and Applied Geography
(2008 Pattern) (Semester - III)

Time : 3 Hours] [Max. Marks :80

Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Draw figures/maps wherever necessary.
4) Use of map stencils is allowed.

Q1) Give a brief account of Greek philosophers contribution to the development of geographical thought.

Q2) Discuss the contributions of Humboldt and Ritter in the development of geographical thoughts.

Q3) Critically examine the concept of duatism with special reference to determinism and possibilism.

Q4) Explain the system approaches in geography.

Q5) Describe various models used in geographical studies.

P.T.O.
Q6) Give the definition need and significance of applied geography.

Q7) Write note on any two:
   
a) Contribution of Marco Polo and columbus.

b) Application of statistical geography.

c) Paradigms in geography.

✦ ✦ ✦ ✦
**Time : 3 Hours**  
**Max. Marks : 80**

**Instructions to the candidates:**
1) Attempt any four questions.
2) All questions carry equal marks.
3) Draw figures/maps wherever necessary.
4) Use of map stencils is allowed.

**Q1)** What are the factors that govern the movement of oceanic water. Explain the process of refraction of waves and its result on coastal erosion.

**Q2)** What is tide? Explain various landforms produced by tidal process.

**Q3)** Explain causes and consequences of sea level changes.

**Q4)** Discuss the properties and types of coastal sediments with reference to gain size characteristics.

**Q5)** Define shore platform. Explain the morphology and formation of shore platforms.

**Q6)** Write an explanatory note on beach erosion as a coastal hazard.

**Q7)** Write notes on (any two).
   a) Morphological classification of coasts.
   b) Wave breakers.
   c) Coastal sand dunes.

\[\times \quad \times \quad \times\]
Instructions to the candidates:
1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Explain radiation laws. Describe various instruments used to measure evapotranspiration.

Q2) Discuss the relation between climate and crops and explain how plant environment is controlled artificially.

Q3) Describe the nature of global environmental change due to pollution and explain problems of urban air pollution.

Q4) Explain the significant climate variables and discuss effects of climate on construction operations.

Q5) Give the importance of satellite programming for monitoring crop condition and discuss development of Indian remote sensing in terms of crop monitoring.

Q6) Explain mechanism of climate change and describe various techniques to study climate change.

Q7) Write notes on any two:
   a) Climate impact assessment.
   b) Effect of climate on air transport.
   c) Heating degree days and cooling towers.

X X X X
Time: 3 Hours

Instructions to the candidates:
1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Explain in detail functional approach of transport geography.

Q2) Explain various characteristics and relative significance of different modes of transport.

Q3) Discuss the transport network and economic development.

Q4) Give an account of the national highway development and planning in India.

Q5) Describe the modern theory of trade.

Q6) Explain the trade areas and economic blocks of the world.

Q7) Write notes on any two:
   a) Economic factors affecting airports.
   b) Types of trade.
   c) History of international trade.
Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Explain the significance of urban geography and its relation to other disciplines.

Q2) Describe the contemporary factors of urbanization.

Q3) Describe the characteristics and demarcation of CBD.

Q4) Explain the process of suburbanization. Conurbation and megalopolis.

Q5) Interrelate the problems of price of land, vertical and horizontal growth of cities and growth of slums.

Q6) Describe the urban policy in India.

Q7) Write note on any two:
   a) Homer Hoyet’s model
   b) Urban population explosion in developing countries.
   c) Concept of city region.
Total No. of Questions : 7]

GEOGRAPHY

Gg - 314 : Geoinformatics - III
(2008 Pattern) (Semester - III)

Time : 3 Hours]

[Max. Marks : 80

Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencil and calculator is allowed.

Q1) Giving suitable examples explain Zonal and Global grid operations in spatial analysis.

Q2) Discuss with suitable examples various application areas of DEM & DTM.

Q3) What is image enhancement? Discuss various methods of image enhancement.

Q4) Give an account of Classification accuracy in digital image processing.

Q5) Explain basic concepts of Radar and discuss the utility of SRTM and hyper spectral remote sensing.

Q6) Discuss with suitable examples various applications of Microwave and thermal remote sensing.

PTO.
Q7) Write notes on any two:
   a) Point pattern analysis
   b) TVI and GNDVI
   c) SLR and LIDAR
Q1) a) Define following matrices giving suitable examples. [6]
   i) Diagonal matrix,
   ii) Lower triangular matrix,
   iii) Column matrix

b) Find the unknowns in the following simultaneous equations using the matrix solution. [8]
   \[
   \begin{align*}
   5x - y + 12z &= 46 \\
   4x + 4y - 4z &= 24 \\
   0.9x - 0.5y - 0.3z &= 2.4
   \end{align*}
   \]

c) Find determinant and adjoint of the following matrix: [6]
   \[
   A = \begin{pmatrix}
   1 & 2 & 3 \\
   6 & 1 & 3 \\
   2 & 1 & 4
   \end{pmatrix}
   \]
   \[
   D = \begin{pmatrix}
   2 & 5 \\
   3 & 8
   \end{pmatrix}
   \]

P.T.O.
Q2) a) Find the cubic regression equation from the following data
\[
\begin{align*}
\sum x &= 5.5 & \sum xy &= -5.3 & \sum x^2 y &= -5.5 & \sum x^3 y &= -4.7 & \sum y &= 1 \\
\sum x^2 &= 3.4 & \sum x^3 &= 3.0 & \sum x^4 &= 2.5 & \sum x^5 &= 2.2 & \sum x^6 &= 1.9 \\
\bar{x} &= 0.6 & \bar{y} &= 0.8
\end{align*}
\]
b) Describe the nature of bivariate nonlinear relationships in physical geography.

Q3) a) Find multiple regression equation from the following matrix of variance covariance

<table>

Q7) Write notes (any two):

a) Bivariate and Multivariate analysis.

b) Multiple regression.

c) Factor scores.

★★★★★
Q1) Define political geography and explain its nature and scope.

Q2) Explain the types of approaches in political geography and highlight functional and landscape approach in detail.

Q3) Discuss and differentiate the concepts of Nation and State with geographical perspective.

Q4) Distinguish between frontiers and boundaries. Describe functional or morphological classification of boundaries.

Q5) Discuss the global geostrategic views of Mackinder.

Q6) Classify the resources and correlate them with national strategy and management.

P.T.O.
Q7) Write notes on any two:

a) Geopolitical importance of Indian Ocean.

b) Problems of border states of India.

c) Unity in diversity in India.
Q1) Discuss the relationship between human geography and soils.

Q2) Describe the role of parent material and topography in the formation of soil.

Q3) Give an account of organic matter and humus content in the soil.

Q4) Explain the colour and structure of soil as a morphological feature of soil horizons.

Q5) Describe the process of formation of secondary clay minerals and their distribution in soil profile.

Q6) Write an account of land suitability classification.
Q7) Write notes on any two:
   a) Soil biomass.
   b) Deforestation.
   c) Soil degradation.
M.A./M.Sc.
GEOGRAPHY
Gg - 401 : Resource Management
(2008 Pattern) (Semester IV)

Time : 3 Hours

Instructions to the candidates:
1) Attempt any four questions.
2) All questions carry equal marks.
3) Draw figures/maps wherever necessary.

Q1) What is resource management? Discuss the models of resource management. [20]

Q2) Discuss the methods of conservation and management of mineral resources. [20]

Q3) Write an account of application of remote sensing technique in resource appraisal and management. [20]

Q4) Explain the various bases of classification of resources. [20]

Q5) “Sustainable resource development is the need of the hour” Discuss. [20]

Q6) Discuss the development policies of industries in India. [20]

Q7) Write notes (Any Two):
   a) Approaches to resource management.
   b) Integrated surveys of natural resources
   c) Population as a resource [20]
Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Discuss the role of geography in regional planning.

Q2) What is region? Discuss various types of regions.

Q3) Discuss the importance of regional and techno-economic surveys for regional planning.

Q4) What is regional development? Discuss various planning strategies with suitable examples.

Q5) Discuss experience of regional planning in India.

Q6) What is regionalisation? Discuss regionalisation for planning with respect to metropolitan regions.

Q7) Write notes (Any two):
   a) Regional disparities in India.
   b) Block level planning.
   c) Role of Geography in Regional Planning.
Total No. of Questions : 7]

P 2064

M.A./M.Sc.
GEOGRAPHY
Gg - 421 : Geography of Water Resources
(2008 Pattern) (Semester-IV)

Time : 3 Hours]  [Max. Marks : 80

Instructions to the candidates:

1) Attempt any four questions.
2) All questions carry equal marks.
3) Use of map stencils is allowed.

Q1) Give an account of distribution of worlds surface water resources with respect to glaciers and rivers.

Q2) Describe water supply and utilization methods for agricultural uses of water.

Q3) Write the details of different methods of irrigation.

Q4) Outline the major problems associated with water resources.

Q5) Give an account of domestic and commercial use of water.

Q6) Discuss integrated basin planning as a useful methodology in water conservation.

Q7) Write notes (Any Two):
    a) India - Bangladesh water dispute.
    b) Water harvesting techniques.
    c) Soil - water - crop relationship.
Q1) Explain the role of biogeography in environmental studies.

Q2) “Altitude affects zonation of the biographical pattern”. Elucidate.

Q3) Explain the dispersal and colonization processes with suitable examples.

Q4) Write a note on the evolution of life on earth.

Q5) How pattern of climate acts as physical limitation of life?

Q6) Discuss biogeography patterns and importance of the mid latitude grassland biome.

Q7) Write notes on (Any Two):
   a) Speciation.
   b) Habitat and microhabitats.
   c) Island as an area of isolation.
Q1) Define ecosystem and explain spatial and temporal dimensions of ecosystem.

Q2) State major terrestrial ecosystems of the world and explain desert ecosystem in detail.

Q3) Explain different man made ecosystems in detail.

Q4) Give a detail account of ecology of tropical farming systems.

Q5) What is mountain ecosystem? Explain the impact of human activities on Aravali hills.

Q6) Explain National Environmental Tribunal Act of India.

Q7) Write notes (Any two):
   a) Land resources and world food security.
   b) Urban ecosystem.
   c) Abiotic components of ecosystem.
**Time : 3 Hours**  

**Instructions to the candidates:**

1) Attempt any four questions  
2) All questions carry equal marks  
3) Draw figures/maps wherever necessary

---

**Q1)** Define surveying and explain the importance and types of surveying.  

**Q2)** Discuss the methods and importance of morphometric analysis from toposheets.  

**Q3)** Explain the database creation from satellite image.  

**Q4)** Discuss testing of hypothesis with the help of parametric and non-parametric tests.  

**Q5)** Evaluate the importance of components of field work.  

**Q6)** Write a geographical essay on report writing.  

**Q7)** Write notes (any two):  
   a) The UTM projection.  
   b) Principles of GIS.  
   c) Measurement of relative height from aerial photographs.
Q1) Describe the various Methodological approaches to the social - cultural Geography

Q2) Write the details of bases and concepts in social and cultural geography.

Q3) What is space? Discuss various types with their characteristics

Q4) Explain various models of social structure. Describe the impact of modernization on social structure.

Q5) Describe the characteristics of region and explain the various bases of social and cultural regions with examples

Q6) Discuss the patterns of social well being in India with reference to various states
