MATHEMATICS

MT-221: Linear Algebra

(2013 Pattern) (Semester-II) (Paper-I) (81112)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

Q1) Attempt any FIVE of the following. [10]

- a) Define subspace of a vector space.
- b) By inspection, explain why the set of vectors $S=\{(-1,2,4), (5,-10,-20)\}$ is linearly dependent in \mathbb{R}^3 ?
- c) Define basis of a vector space.
- d) Determine $(T_2 \circ T_1)(x,y,z)$ if $T_1(x,y,z)=(y,z)$ and $T_2(x,y)=x$.
- e) Let $T : \mathbb{R}^2 \rightarrow \mathbb{R}^2$ be the linear operator given by $T(x,y)=(2x-y, -8x+4y)$. Is $(5,10)$ belongs to $\ker(T)$? Justify.
- f) Let P_2 be the vector space with inner product $\langle p,q \rangle = \int_{-1}^1 p(x) q(x) dx$.
show that $p(x)=1$ and $q(x)=x$ are orthogonal in P_2 .
- g) If \bar{u} and \bar{v} are orthonormal vectors in an inner product space V , then find $\|\bar{u} + \bar{v}\|$.

Q2) Attempt any TWO of the following. [10]

- a) Let $B=\{\bar{v}_1, \bar{v}_2, \bar{v}_3, \dots, \bar{v}_n\}$ be a basis for a vector space V . Then prove that every vector $\bar{v} \in V$ is uniquely expressed as a linear combination of the vectors of B .

P.T.O.

- b) Are the vectors $(1,1,2,4)$, $(2,-1,-5,2)$, $(-1,-1,-4,0)$, $(2,1,1,6)$ linearly independent in \mathbb{R}^4 ?
- c) Determine the basis and dimension for the solution space of,

$$x_1 + 2x_2 + 2x_3 - x_4 + 3x_5 = 0$$

$$3x_1 + 6x_2 + 8x_3 + x_4 + 5x_5 = 0$$

$$x_1 + 2x_2 + 3x_3 + x_4 + 5x_5 = 0$$

Q3) Attempt any TWO of the following. [10]

- a) State and prove Cauchy-Schwartz inequality.
- b) Show that for vectors $\bar{u} = (u_1, u_2)$ and $\bar{v} = (v_1, v_2)$ in \mathbb{R}^2 ,

$$\langle \bar{u}, \bar{v} \rangle = 5 u_1 v_1 - u_1 v_2 - u_2 v_1 + 10 u_2 v_2$$

defines an inner product on \mathbb{R}^2 .

- c) Let $T: \mathbb{R}^3 \rightarrow \mathbb{R}^3$ be defined by

$$T(x, y, z) = (4x+3y+2z, 2x+y-z, -x+y)$$

Find a basis and dimension of kernel of T .

Q4) Attempt any ONE of the following. [10]

- a) i) In an inner product space V and for \bar{u}, \bar{v} in V , prove that
- $$\|\bar{u} + \bar{v}\|^2 + \|\bar{u} - \bar{v}\|^2 = 2\|\bar{u}\|^2 + 2\|\bar{v}\|^2$$
- ii) Let \mathbb{R}^2 have Euclidean inner product. Use Gram-Schmidt process to transform the basis vectors $\bar{u}_1 = (1, 3)$ and $\bar{u}_2 = (2, -2)$ into an orthonormal basis.
- b) i) Prove that a linear transformation $T: V \rightarrow W$ has an inverse if it is bijective.
- ii) Resolve the vector $\bar{v} = (1, 2, 1)$ into two perpendicular components along $\bar{u} = (2, 1, 2)$.

MATHEMATICS

MT - 222 (A) : Multivariable Calculus-II

(2013 Pattern) (Semester - II) (Paper - II(A)) (811A2)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

Q1) Attempt any five of the following:

[10]

- a) If $\bar{u} = (a \sin t)\bar{i} - (a \cos t)\bar{j} + bt\bar{k}$, find $\left| \frac{d\bar{u}}{dt} \times \frac{d^2\bar{u}}{dt^2} \right|$ at $t=0$.
- b) Define Curvature.
- c) Show that the vector field $\bar{F} = xy\bar{i} + zx\bar{j} - yz\bar{k}$ is solenoidal.
- d) Evaluate $\int_C x^2 dx + xy dy + dz$ where C is given by
$$\bar{r}(t) = t\bar{i} + t^2\bar{j} + \bar{k}, 0 \leq t \leq 1.$$
- e) State Stoke's theorem.
- f) Prove that $\bar{F} = (y^2 \cos x + z^3)\bar{i} + (2y \sin x - 4)\bar{j} + (3xz^2 + 2)\bar{k}$ is a conservative force field.
- g) Using divergence theorem, show that

$$\iint_S (x + 5z) dy dz + (2y - z) dz dx + (2x - y) dx dy = 3V$$

where V is the volume enclosed by the surface S.

P.T.O.

Q2) Attempt any Two of the following: [10]

- If $\bar{r}(t)$ is a differentiable function at t_0 , then show that it is continuous at t_0 . Is the converse true? Illustrate by an example.
- A particle moves along the curve $x = 2t^3$, $y = t^2 - 4t$, $z = 3t - 5$, where 't' is the time. Find the component of velocity and acceleration at time $t=1$ in the direction of $\bar{i} - 3\bar{j} + 2\bar{k}$.
- Find the acute angle between the tangents to the curve $\bar{r} = t^2\bar{i} + 2t\bar{j} - \frac{1}{2}t^2\bar{k}$ at the points $t=1$ and $t=-3$.

Q3) Attempt any two of the following: [10]

- If \bar{u} is a vector function which possesses continuous second order partial derivatives then prove that $\nabla \cdot (\nabla \times \bar{u}) = 0$
- Evaluate $\int_C \bar{F} \cdot d\bar{r}$, where $\bar{F} = yz\bar{i} + 2y\bar{j} - x^2\bar{k}$ along the path C consisting of line segments from $(0,0,0)$ to $(0,0,1)$ then to $(0,-3,1)$ and then to $(2,-3,1)$.
- If \bar{w} is a constant vector and $\bar{v} = \bar{w} \times \bar{r}$ then show that $\bar{w} = \frac{1}{2} \operatorname{curl} \bar{v}$

Q4) Attempt any One of the following: [10]

- i) State Green's theorem. Using Green's theorem evaluate

$$\int_C (xy + y^2) dx + x^2 dy, \text{ where } C \text{ is the closed curve of the region}$$

bounded by $y = x$ and $y = x^2$.

- ii) Evaluate $\iint_S \bar{F} \cdot \hat{n} ds$, where $\bar{F} = 18z\bar{i} - 12\bar{j} + 3y\bar{k}$ and S is that part of the plane $2x + 3y + 6z = 12$ which is located in $x \geq 0$, $y \geq 0$, $z \geq 0$.

b) i) Prove by using Stoke's theorem that

$$\int_C (\sin z \, dx - \cos x \, dy + \sin y \, dz) = 2, \text{ where}$$

C is the boundary of the rectangle $0 \leq x \leq \pi, 0 \leq y \leq 1, z = 3$

ii) Show that $\bar{F} = (2xy + z^3)\bar{i} + x^2\bar{j} + 3xz^2\bar{k}$ is a conservative field.
Find the scalar potential $\phi(x, y, z)$ such that $\bar{F} = \text{grad } \phi$.

[Total No. of Pages : 3

[5315] - 203

S.Y. B.Sc.

PHYSICS - I

PH-221: Oscillations, Waves and Sound

(2013 Pattern) (Semester-II) (Paper-I)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat diagrams wherever necessary.
- 4) Use of logtable and calculator is allowed.

Q1) Attempt all of the Following:

[10]

- a) State different types of equilibria.
- b) Define energy density of wave. Give its unit.
- c) Define Quality Factor (Q) of damped harmonic oscillator.
- d) Give two applications of Lissajous Figures.
- e) State the conditions for critically damped oscillations in LCR circuit.
- f) In list the resonance phenomena occurs widely used in natural and in technology applications.
- g) What is red Shift?
- h) What are the Factors which affects quality of sound?
- i) Determine the bulk modulus of water. If the velocity of sound in water is 1500 m/s.
(Give density of water = 1000 kg/m³)
- j) Calculate the velocity of light, if a spectral line of wavelength 5890 Å° in spectrum of a star to be displayed towards red end by 1 Å°.

P.T.O.

Q2) Attempt any two of the Following:

[10]

- a) Discuss the phenomenon of sharpness of resonance and show how it depends on the damping Factor.
- b) Show that the energy density of a plane progressive wave propagating through medium is directly proportional to square of the amplitude of particle.
- c) Explain the following characteristic of musical sound
 - i) Loudness
 - ii) Pitch

Q3) Attempt any Two of the following:

[10]

- a) A particle performing S.H.M has velocity 8cm/sec and 10 cm/sec, when it is at distance 5cm and 4cm respectively from mean position. what is it's amplitude.
- b) The equation of forced oscillation is given by

$$2\left(\frac{d^2x}{dt^2}\right) + 3\left(\frac{dx}{dt}\right) + 16x = 30 \sin 2t$$

All quantities are expressed in CGS units.

Find velocity. amplitude (V_0) and maximum kinetic Energy.

- c) The equation of damped harmonic motion is given by

$$2\left(\frac{d^2x}{dt^2}\right) + 12\left(\frac{dx}{dt}\right) + 50x = 0$$

Find frequency on damped oscillations.

Q4) A) Attempt any ONE:

[8]

- a) i) Obtain the equation of motion of simple harmonic progressive transverse wave.
- ii) Show that Doppler effect of sound is asymmetric in nature.

- b) i) Show that total energy of undamped simple harmonic oscillator is constant at any instant of motion and proportional to the square of amplitude of oscillation.
- ii) Expression for it.

(B) Attempt any ONE: [2]

- i) A fixed source emits sound of frequency 1000 Hz .

What is the Frequency as heard by observer moving away from source at the rate. 20 m/s . [Given velocity of sound in air $c = 340 \text{ m/s}$]

- ii) The intensity of two sound waves are $2 \times 10^{-9} \text{ w/m}^2$ and $4 \times 10^{-10} \text{ w/m}^2$ respectively. Determine their relatively loudness in decibels.

PHYSICS

PH-222: Optics

(2013 Pattern) (Semester-II) (Paper-II)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat diagrams wherever necessary.
- 4) Use of logtable and calculator is allowed.

Q1) Attempt all of the following: (one mark each) **[10]**

- a) Define the term power of the lens.
- b) Define the term radius of curvature of the lens.
- c) What is an aplastic lens?
- d) Define plane polarized light.
- e) Calculate grating element of plane Transmission grating with 5000 lines per centimeter.
- f) Find the angle of polarization for the glass plate. (Given $\mu = 1.54$ for the glass)
- g) What do you mean by aberration?
- h) What is meant by Negative crystal?
- i) Define term linear magnification.
- j) Why Ramsden eye-piece is called positive eyepiece?

P.T.O.

Q2) Attempt any two of the following: (five marks each)

[10]

- Explain the phenomenon of interference in thin parallel sided film. Obtain the expression for minima and maxima for the reflected rays.
- Prove that for a combination of two thin coaxial lenses of focal lengths F_1 and F_2 , separated by distance x , the focal length of combination is given by equation $\frac{1}{F} = \frac{1}{f_1} + \frac{1}{f_2} - \frac{x}{f_1 f_2}$.
- Define the Magnifying power of simple microscope. Draw neat ray diagram and show that maximum magnifying power of simple microscope is $\left(1 + \frac{D}{f}\right)$.

Q3) Attempt any two of the following: (Five marks each)

[10]

- The focal length of an achromatic combination of two lenses in contact is 90 cm. the dispersive powers of the lenses are 0.025 and 0.035. calculate focal length of each lens of the combination.
- Two optically plane glass plates, each 6cm long are placed one over the other. At one end a mica strip is introduced between them. Seen in the reflected light of wavelength 5.89×10^{-5} cm, we find 100 fringes in 3 cm length. calculate the thickness of mica strip. (Given: $\mu=1$)
- Unpolarized light falls on two polarizing sheets placed one on top of other. what must be angle between the characteristic directions of the sheets, if intensity of the transmitted light is one third of the incident beam.

Q4) a) Attempt the following:

- Show that refraction at single curved surface obeys an equation

$$\frac{\mu_2 - \mu_1}{v} - \frac{\mu_2 - \mu_1}{u} = \frac{\mu_2 - \mu_1}{R}. \quad [4]$$

- Show that the condition of minimum spherical aberration for coaxial system of two planoconvex lenses separated by distance x is given as $x = f_1 - f_2$. [4]

OR

- i) State and explain Rayleigh criterion for Resolution. [4]
- ii) Draw the ray diagram of Huygens eye-piece and obtain the principal points of Huygen's eyepiece. [4]
- b) Attempt any one of the following:
- i) In Newton's rings experiment, the diameter of 10th dark ring is found to be 4 mm. Assuming the air film and radius of curvature of plano convex lens 100 cm, calculate the wavelength of light. [2]
- ii) Explain term principle focus using convex lens and concave lens. [2]

CHEMISTRY

**CH-221: Physical and Analytical chemistry
(2013 Pattern) (Semester II) (Paper-I)**

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Figures to the right indicate full marks.
- 4) Use of calculator is allowed.
- 5) Answer to both sections should be written on same answer book.

SECTION - I

[Physical Chemistry]

Q1) Answer the following: **[5]**

- a) Define standard free energy of formation.
- b) What is relation between K_p and K_c ?
- c) Define molality.
- d) What are Azeotropes?
- e) What are conjugate solutions?

Q2) a) Attempt any two of the following: **[6]**

- i) Derive an expression for free energy change of a chemical reaction.
- ii) State Henry's law and give its applications.
- iii) Write note on fractionating column.

P.T.O.

b) Attempt any two of the following: [4]

i) Derive $\left[\frac{\partial G}{\partial T} \right]_P = -S$

ii) What is chemical equilibrium? Give its types.

iii) Define ideal and non-ideal solutions.

Q3) Solve any two of the following: [5]

a) For a reaction $\Delta G = -91630$ Joule at $25^\circ C$ and 1 pascal pressure. Find out the temperature coefficient at $25^\circ C$, if the heat of reaction is -105060 Joule/deg.

b) The vapour pressure of water is 2.5×10^5 pascal at $27^\circ C$ and 7.5×10^5 pascal at $37^\circ C$. calculate molar heat of vapourization of water.

[$R = 8.314$ J/K/mole].

c) The mixture of immiscible liquid and water boils at $98^\circ C$ at 755 mm Hg. The vapour pressure of water at this temperature is 712 mm Hg. Find the weight composition of the distillate.

[Given : Mol. wt. of immiscible liquid = 204]

SECTION - II

[Analytical Chemistry]

Q4) Answer the following: [5]

- a) Give any two examples of primary standard substance.
- b) What is parts per thousand?
- c) Define Reducing agent.
- d) What is universal indicator?
- e) Define Equivalence point.

Q5) a) Answer any two of the following. [6]

- i) What is calibration? How will you calibrate volumetric flask?
- ii) What is Titration? Explain the titration curve for a strong acid and a weak base.
- iii) What is Redox indicator? How will you prepare 0.1M. potassium dichromate.
(Mol.wt.of potassium dichromate =294.19 gm).

b) Answer any two of the following: [4]

- i) Discuss titration curve between Fe^{+2} and Ce^{+4} .
- ii) Give the pH transition range and colour in acid form and base form for.
 - a) Cresol red
 - b) phenolphthalein
- iii) What is principle of conductometry? what are types of conductometric titrations?

Q6) Solve any two of the following: [5]

- a) How many ml of 0.1N HCl are required to neutralise 100 ml of 0.5N NaOH?
- b) What is the normality of solution, when 1000 ml 0.25 N NaOH mixed with 50 ml of 0.1N NaOH?
- c) What is the pH of the solution which contains 5% millimoles of sodium formate and 5.8 millimoles of formic acid in 100ml solution. $[K_a=1.7\times 10^{-4}]$.

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) Answer of the two sections should be written in the same answer book.
- 2) All questions are compulsory.
- 3) Neat diagrams must be drawn wherever necessary.

SECTION-I

(Organic Chemistry)

Q1) Attempt the following.

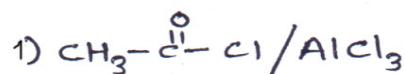

[5]

- a) What is Lindlar's catalyst? Give its important use.
- b) Why furan is aromatic?
- c) Define Biochemistry.
- d) Give any two applications of KMnO₄.
- e) Explain the term 'Zwitter ion'.

Q2) a) Attempt any Two of the following:

[6]

- i) What is reduction ? Give two important applications of LiAlH₄.
- ii) Give the synthesis of pyrrole. What is the action of following on pyrrole?

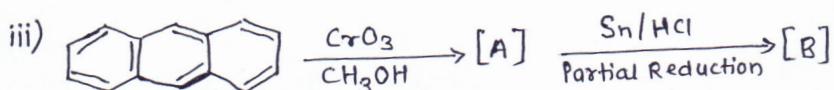

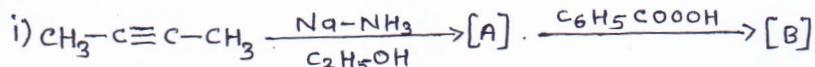

- iii) What are carbohydrates? Discuss the classification of carbohydrates with suitable examples.

P.T.O.

b) Assign [A] and [B] of the following reaction (Any Two)

[4]

Q3) Attempt any Two of the following:

[5]

- What are α -amino acids? Discuss the classification of α -amino acids.
- What is Jone's reagent? Give any two important applications-of Jone's reagent.
- Define peptide linkage. Draw the structure of following amino acids.
 - Phenylalanine
 - Serine

SECTION-II **(Inorganic Chemistry)**

Q4) Answer the following:

[5]

- Write the electronic configuration of copper (Atomic number, Cu=29).
- How many bridging carbonyls are present in $[\text{Co}_2(\text{CO})_8]$
- Define acids and bases according to lewis theory.
- Define 'chemical toxicology'.
- What are amphiprotic solvents?

Q5) a) Answer any Two of the following:

[6]

- What are d-block elements? Explain the following properties of d-block elements.
 - Atomic size
 - Catalytic activity
- Define EAN rule. Find out the valence electrons in the following metal carbonyls.
 - $\text{Cr}(\text{CO})_6$
 - $\text{Fe}(\text{CO})_5$
 (Atomic number of Cr=24 and Fe=26)
- Explain the Lowry-Bronsted concept of acids and bases. Give its merits and demerits.

b) Attempt any Two of the following: [4]

- i) Explain ‘Biochemical methylation’.
- ii) Why Transition metals have ability to form co-ordination compounds?
- iii) Why “BF₃ is stronger lewis acid than BH₃”?

Q6) Answer any Two of the following: [5]

- a) Write a note on Biochemical effects of lead.
- b) What is spin only formula? Calculate magnetic moment of Co²⁺ and Ni²⁺ ion by using spin-only formula.
(Atomic number of Co=27 and Ni=28)
- c) Define back bonding. Draw the structure of
 - i) M₀ (Co)₆
 - ii) Ir₄ (Co)₁₂

GEOLOGY

GL-221 : Petrology

(2013 Pattern) (Semester-II) (Paper-I)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Neat diagrams must be drawn wherever necessary.

Q1) Attempt the following questions. [10]

- a) Define Eutectic.
- b) Give genesis of spherulitic structure.
- c) Give any one point difference between metamorphism and diagenesis.
- d) Define the term crush conglomerate.
- e) Define Expansion crack structure.
- f) Give the temperature of the magma.
- g) Define reaction rim/corona structure.
- h) Give the names of the product of thermal. Metamorphism of pure and impure limestone.
- i) Define Poikilitic texture.
- j) Define Idioblastic crystals.

Q2) Write notes on (Any Two): [10]

- a) Describe the concept of matrix and cement and its effects on porosity and permeability.
- b) Describe the modes of transportation including phases of traction.
- c) Describe sandstone rock deposits with respect to its definition, texture/structure mineral composition and name its varieties.

P.T.O.

Q3) Answer the following questions on (any two): **[10]**

- a) Describe the classification of igneous rocks based on its colour index, and feldspar content.
- b) Describe the Bauxite rock with respect to its texture / structure & mineral composition.
- c) Describe the following structures with respect to their origin and environmental significance.
 - i) Ripple mark &
 - ii) Lamination.

Q4) Describe the crystallisation of a bi-component magma with the help of solid-solution series. **[10]**

OR

Define metamorphism. Describe the regional metamorphism of argillaceous and basic igneous rocks.

GEOLOGY

GL-222 : Stratigraphy and Palaeontology

(2013 Pattern) (Semester-II) (Paper-II)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.**
- 2) Draw the diagrams wherever necessary.**
- 3) Figures to the right indicate full marks.**

Q1) Answer the following questions:

[10]

- a) Define correlation.
- b) Define index fossil.
- c) What is the definition of stratigraphy given by a palaeo - geographer?
- d) Define magnetostratigraphy.
- e) Define bedding.
- f) Give importance of stratigraphy.
- g) Define a chronozone.
- h) Enumerate the chemical deposits resulting in stratification.
- i) Define biostratigraphy.
- j) Enumerate the biological factors associated with the development of stratification.

Q2) Write notes on (Any Two):

[10]

- a) Types of Microfossils.
- b) Systematic position and palaeo-ecological significance of foraminifera.
- c) Morphology of hard parts of Ostracods.

P.T.O.

Q3) Explain the following (any two): [10]

- a) Evolutionary trends in Glabella and Eyes of Trilobites.
- b) Uses of Microfossils.
- c) Field techniques for collection of microfossils.

Q4) Define chronostratigraphy and a chronostratigraphic unit. Describe chronostratigraphic units in detail. [10]

OR

What is meant by vertical succession in stratigraphy? Describe the characters by which vertical successions are identified.

STATISTICS

ST-221: Statistical Methods and Use of R- Software

(2013 Pattern) (Semester II) (Paper-I)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of scientific calculator and statistical tables is allowed.
- 4) Symbols and abbreviations have their usual meaning.

Q1) Attempt each of the following:

- a) Choose the correct alternative for each of the following: (1 each)
- i) If $3Y - 12X_1 - 9X_2 = 90$ is the equation of the regression plane of Y on X_1 and X_2 then by X_2 , X_1 is equal to
 - A) -3
 - B) 3
 - C) 30
 - D) -10
 - ii) Rejecting H_0 when H_1 is true leads to
 - A) type I error
 - B) type II error
 - C) correct decision
 - D) either type I or type II error
 - iii) When N.R.R. = 1 then we interpret that:
 - A) population remains constant.
 - B) female population will exactly replace it self.
 - C) there is no mortality in female.
 - D) all the above.

P.T.O.

- b) State whether the given statement is true or false in each of the following:
(1 each)
- i) If $R_{Y,x_1x_2} = 0$ then both r_{yx_1} and r_{yx_2} must be equals to zero.
 (i.e if $R_{1,23}=0$ then $r_{12}=r_{13}=0$)
 - ii) Critical region is the region of acceptance of null hypothesis H_0 .
 - iii) NRR is greater than GRR.
- c) Define total fertility rate (T.F.R.) **[1]**
- d) Write a command in R- software to draw a random sample of size 5 out of 50 units by SRSWOR and store it in a vector **[1]**
- e) Define term ‘traffic density’ in queuing theory. **[1]**
- f) Define Level of significance (.l.o.s.) **[1]**

Q2) Attempt any two of the following: **(5 each)**

- a) Derive the formula for the partial correlation coefficient $r_{y|x_1,x_2}$ (i.e $r_{12,3}$) in terms of total correlation coefficients.
- b) A company manufacturing electric bulbs claims that the average life of bulbs is 1200 hours. A random sample of 100 bulbs shows the average life is 1180 hours. The standard deviation of the life of bulbs is known to be 150 hours. Test the company’s claim at 5% l.o.s.
- c) Tests in communication skills were taken for 6 persons before and after they were given a training. The scores are as follows:

Scores (before) :	48	60	45	70	65	55
Scores (after) :	54	72	50	78	68	62

Write commands in R-software to carry out a paired t-test to check whether there is any effect on the average score of the training or not.

Q3) Attempt any two of the following: **(5 each)**

- a) Explain a large sample test to test $H_0: \mu_1 = \mu_2$ against $H_1: \mu_1 \neq \mu_2$, where μ_1 and μ_2 are population means of two populations. TWO independent random samples of large sizes n_1 and n_2 are taken from these populations. The population variances are known.

- b) One customer arrives at a counter in a bank after every 15 minutes. Staff on the counter take 10 minutes on an average for serving a customer. Under the assumptions for applying M/M/1 : ∞ /FC FS model, find
- Average queue length
 - A second counter will be started if waiting time of customer in the queue is atleast 15 minutes. Can you justify a need of second counter?
- c) Compute (i) C.B.R. (ii) G.F.R. and (iii) Age - S.F.R. for the following data.

Age - group	No. of Women	No. of Births
20-24	24,000	800
25-29	20,000	2,400
30-34	15,000	2,000
35-39	12,000	600
40-44	6,000	120
45-49	4,000	10

The total population is 1,86,300

Q4) Attempt any one of the following:

- a) i) Derive the equation of least square regression plane of Y on X_1 and X_2 . [7]
 ii) Explain the terms: P-value, confidence-interval. [3]
- b) i) Explain how to construct a $100(1-\alpha)$ % Confidence interval for population mean (μ) of normal distribution when standard deviation σ is known, while testing $H_0: \mu = \mu_0$ against $H_1: \mu \neq \mu_0$. [5]
 ii) A quality control manager of an electronic plant thinks that, handicaped people do better work than the normal people. A sample of 400 items produced by the handicaped found to have 20 defectives. On the other hand a sample of 500 items produced by the normal people found to have 32 defectives.
 Do the above data supports managers claim? Use 1% l.o.s., Justify the answer. [5]

STATISTICS

ST-222: Sampling Distributions and Inference

(2013 Pattern) (Semester- II) (Paper-II)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of calculator and statistical tables is allowed.
- 4) Symbols and abbreviations have their usual meaning.

Q1) Attempt each of the following:

- a) Choose the correct alternative in each of the following: [1 each]
- i) If X_1 and X_2 are independent random variables (r.v.s) having $N(0,1)$ and $N(0,16)$ distribution respectively then probability distribution of $X_1^2 + \frac{1}{4}X_2^2$ is
- A) $N(0,17)$ B) χ_2^2
C) t_2 D) $F_{1,1}$
- ii) If a r.v. has chi-square distribution with variance equal to 8 then it's moment generating function (m.g.f.) is given by
- A) $(1-2t)^{-2}$ B) $(1-t)^{-2}$
C) $(1-2t)^2$ D) $(1-t)^2$
- iii) Suppose e_1, e_2, e_3 and e_4 are expected frequencies such that $e_1, e_2 > 5$ and $e_3 + e_4 = 8$ are obtained after fitting a probability distribution in which one parameter is estimated. Then under H_0 : fitting of probability distribution is good, the test statistic used
- A) χ^2 with 1 degrees of freedom (d.f.)
B) χ^2 with 2 d.f.
C) χ^2 with 4 d.f.
D) χ^2 with 3 d.f.

P.T.O.

b) State whether each of the following statement is true or false: [1 each]

- i) If r.v. F follows $F_{2,2}$ distribution with $Q_1 = 5$ then $Q_3 = \frac{1}{5}$.
 - ii) Let X be a r.v. having t-distribution with 5 d.f. Then the value of μ_4 is equal to $\frac{25}{2}$.
 - iii) Let X_1, X_2, \dots, X_n be a random sample (r.s.) from $N(\mu, \sigma^2)$, μ is unknown. To test $H_0: \sigma^2 = \sigma_0^2$ against $H_1: \sigma^2 > \sigma_0^2$ the rejection region is $\chi_{n-1}^2 \leq \chi_{n-1,1-\alpha}^2$ at α level of significance (l.o.s.).
- c) State limiting behaviour of χ_n^2 as $n \rightarrow \infty$ according to Fisher's approximation. [1]
- d) State the standard error of the statistic $\frac{\sum_{i=1}^n (X_i - \bar{X})^2}{n}$ [1]
- e) Give one real life situation where chi-square test of independence can be used. [1]
- f) Distinguish between two sample t-test and paired t-test. [1]

Q2) Attempt ANY TWO of the following: [5 each]

- a) Find the mode of a chi-square distribution with n d.f. Also if $X \sim \chi_n^2$ and mode of the distribution is 5 find $P(X > 2.167)$.
- b) If a r.v. $U \sim N(0,1)$, $V \sim \chi_n^2$ and are independent then find the distribution of $\frac{U}{\sqrt{\frac{V}{n}}}$.

- c) If $X \sim \chi^2_{10}$, $Y \sim \chi^2_9$ and are independent r.v.s then find
- $P[12.242 < Y < 21.666]$
 - Median of Y
 - $P[X+Y \geq 21.689]$.

Q3) Attempt ANY TWO of the following: [5 each]

- If a r.v. $X \sim F_{n_1, n_2}$ then find the distribution of $\frac{1}{X}$.
- Derive a test statistic to test $H_0: \sigma_1^2 = \sigma_2^2$ against $H_1: \sigma_1^2 \neq \sigma_2^2$. Also state the assumptions if any.
- If \bar{X} and S^2 are the mean and the variance of a r.s. of size 10 from $N(4, 16)$ then find $P(-1 < X < 4, 6.6688 < S^2 < 17.0496)$.

Q4) Attempt ANY ONE of the following:

- i) If X_1, \dots, X_n is a r.s. from $N(\mu, \sigma^2)$ distribution then show that sample mean (\bar{X}) and sample variance (S^2) are independently distributed. [6]
- ii) For two independent normal populations we have the following information :

$$\text{Sample means} \quad \bar{X}=10 \quad \bar{Y}=12$$

$$\text{Sample variances} \quad S_1^2=46 \quad S_2^2=50$$

$$\text{Sample sizes} \quad n_1=15 \quad n_2=15$$

To test $H_0: \mu_1 = \mu_2$ against $H_1: \mu_1 \neq \mu_2$, calculate the 95% confidence interval for $(\mu_1 - \mu_2)$. Also give the conclusion. (Use $\alpha=5\%$) [4]

b) i) If $X \sim F_{n_1, n_2}$ and $Y \sim F_{n_2, n_1}$ then show that $P(X \geq a) + P\left(Y \geq \frac{1}{a}\right) = 1$ [2]

ii) A certain stimulus is administered to each of 12 patients resulted in the following increase in blood pressure:

5, 2, 8, -1, 3, 0, 4, 6, -2, 1, 5, 0

Can it be concluded that the administration of the stimulus in general will be accompanied by increase in the b.p.? Use appropriate test to give the answer. (Use l.o.s. = 0.05) [4]

iii) Write a short note on McNemar's test. [4]

GEOGRAPHY

Gg - 221: Geography of Resources -II (2013 Pattern) (Semester-II) (paper -I)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat diagrams and sketches wherever necessary.
- 4) Use of map stencils is allowed.

Q1) Answer the following questions in two or three sentences each (Any Ten):

[10]

- a) Name the types of coal with carbon content.
- b) Name any four iron are producing countries in the world.
- c) Name four leading bauxite producing countries in the world.
- d) Write any four nuclear power generating countries in the world.
- e) What is meant by optimum population?
- f) Name any four sparsely populated regions of the world.
- g) Write any two densely populated states in India.
- h) What are the components of natural gas
- i) Write any two uses of land resources.
- j) state any two significance of solar energy.
- k) Write any two uses of water resource.
- l) Define resource planning.
- m) Write any two needs of resource planning in india.

P.T.O.

Q2) Write short notes on the following (Any Two): [10]

- a) Production of bauxite in India.
- b) Advantages and disadvantages of nuclear energy.
- c) Population as a resource.
- d) Resource Planning in India.

Q3) Answer the following questions in 100 words each (Any Two): [10]

- a) What are the advantages and disadvantages of wind energy.
- b) Give an account of distribution of population in India.
- c) Explain the role of energy resources in economic development.
- d) Explain the concept resource planning.

Q4) Answer the following questions in 200 words (Any One): [10]

- a) Give an account of distribution and production of iron ore in world.
- b) Explain the role of mineral resources in economic development.

GEOGRAPHY

Gg - 222: Watershed Management -II (2013 Pattern) (Semester-II) (paper -II)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat diagrams and sketches wherever necessary.
- 4) Use of map stencils is allowed.

Q1) Answer the following questions in two or three sentences each (Any Ten):[10]

- a) What is watershed?
- b) What is drainage map?
- c) Define watershed survey.
- d) What is hydrologic data?
- e) Write any two advantages of participatory planning.
- f) What is capacity building?
- g) Write any two components of livelihood security.
- h) What is cost sharing?
- i) What is check dam?
- j) Give any two traditional methods of storage of harvested water.
- k) Define contour bunding.
- l) Write any two benefits of soil conservation.
- m) What is dryland farming?

Q2) Write short notes on the following (Any Two): [10]

- a) Benifits of survey methods.
- b) Food security.
- c) Gully plugging.
- d) Resource Mapping.

Q3) Answer the following questions in 100 words (Any Two): [10]

- a) Explain database generation method in resource appraisal.
- b) Explain livelihood security.
- c) Explain traditional methods of soil conservation.
- d) Explain crop production tenchniques

Q4) Answer the following questions in 200 words (Any One): [10]

- a) Explain the need of planning for small rainfed catchments.
- b) Explain the watershed based farming system.

MICROBIOLOGY

MB - 221: Bacterial Genetics

(2013 Pattern) (Semester-II) (Paper -I) (Regular)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat labelled diagrams wherever necessary.

Q1) Attempt the following:

[10]

- a) Define Spontaneous mutations.
- b) Define Base Analogues.
- c) Define Relaxed plasmids.
- d) Write 2 example of Alkylating agents.
- e) Structure of Thymine.
- f) Plasmid DNA replicates by _____ mechanism
- g) Fluctuation test was devised by _____.
- h) Purine replaced by a Pyrimidine in DNA is referred to as _____.
- i) State True or False: A form of DNA erusts under dehydrated conditions.
- j) State True or False: Bacterial genome is positively supercoiled.

Q2) Attempt any two of the following.

[10]

- a) Define mutations. Explain using conditional lethal mutants.
- b) Define plasmids Explain the phenomenon of plasmid Incompatibility with suitable example.
- c) Define mutagens. Give role of biological mutagen with a suitable example.

P.T.O.

Q3) Diagrammatically represent any two of the following: [10]

- a) Leading and Lagging strand synthesis.
- b) Hershy and chase experiment.
- c) Q model of Semi- discontinuous replication

Q4) Attempt any one of the following. [10]

- a) What is central dogma. Explain in detail the mechanism of Translation in bacteria.
- b) Define Induced mutations Enlist the various mutagenic agents. Explain in detail the mechanism of action of U.V and X rays on DNA.

MB - 222: Air and Water Microbiology (2013 Pattern) (Semester-II) (paper -II)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat labelled diagram wherever necessary.

Q1) Answer the following. [10]

- a) Define : Droplet.
- b) Air flora is transient in nature.T/F.
- c) Causative agent of Tuberculosis is
- d) Ground water is relatively free from bacteria.T/F.
- e) Write the use of “EijKman test”.
- f) ‘MPCB’ stands for.
- g) Define: Demineralized water.
- h) PPM is the permissible limit of BOD of any waste water body to be disposed off in any fresh water body.
- i) What is activated sludge.
- j) Write the effect of Arsenics on human health.

Q2) Attempt any two of the following. [10]

- a) Diagrammatically explain Anderson’s air Sampler.
- b) Describe E.coli & Streptococcus faecalis are used as indicators of faecal pollution.
- c) Explain; toxicity testing by fish bioassay.

P.T.O.

Q3) Attempt any two of the following. [10]

- a) What is air Sanitation, Describe physical methods of it.
- b) Describe the presumptive test to check potability of water.
- c) Write the applications of biogas.

Q4) Describe solid waste management with respect to Raw materials, organisms involved & their activity. [10]

OR

Q4) Describe waste water treatment by.

- a) Oxidation ponds / Lagoons.
- b) Trickling filters.

- 1) All questions are compulsory.
- 2) Draw the figures and diagrams wherever necessary.
- 3) Figures to the right indicate full marks.

Q1) Answer in two or four sentences.

[16]

- a) Define illness.
- b) Define self imposed.
- c) Define pressure.
- d) Define coping.
- e) Define overeating.
- f) Define poor nutrition.
- g) Define pressure a stress.
- h) Define Burnout.

Q2) Attempt any two of the following in eight or ten sentences.

[8]

- a) Explain the post Traumatic stress disorders.
- b) Explain the Bio-Medical model of illness.
- c) Describe effect of smoking on health.

P.T.O.

Q3) Write short notes on any two of the following. [8]

- a) Behaviour and AIDS.
- b) Problem focused constructive coping.
- c) Frustration.

Q4) What is stress? Describe the major types of stress. [8]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Draw the diagrams wherever necessary.
- 3) Figures to the right indicate full marks.

Q1) Answer in two or four sentences.

[16]

- a) Define Neuro psychology.
- b) State full form of SVIB.
- c) Define psychological test.
- d) What is achievement ?
- e) Define clinical psychology.
- f) Define intellectual ability.
- g) What is job satisfaction.
- h) Define attitude.

Q2) Attempt any two of the following in eight or ten sentences.

[8]

- a) Explain the general Aptitude test Battery.
- b) Describe Interview method for preschool Assessment.
- c) Describe the any two tests of general Intellectual ability.

P.T.O.

Q3) Write short notes on any two of the following. [8]

- a) Controlled word association test.
- b) Assessment center.
- c) Observational method.

Q4) a) Define Aptitude. Explain the any two types of Aptitude Test. In educational assessment. [8]

- b) Define Neuropsychological Assessment ? Explain any two tests of Neuropsychological Assessment.

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Draw neat diagrams wherever necessary.
- 3) Figures to the right indicates full marks.
- 4) Use of non-programmable calculator is allowed.

Q1) Answer All of the following:

- a) What is resolution in instrumentation? [1]
- b) List any two electrical temperature sensors. [1]
- c) Define sweep generater. [1]
- d) Give any two specification of SMPS. [1]
- e) “Initial zero setting for pH measurement is at pH=7”. comment [2]
- f) “On line Ups is also called True Ups”. Comment. [2]
- g) Determine Static error if digital voltmeter read 4.65 voltage and the true of the voltage is 4.52 volts. [2]
- h) In tachometer if number of pulses per seconds are 200 and number of teeth on rotar 20. Find speed of tachometer in rpm. [2]

Q2) Answer any Two of following:

- a) Explain various types of errors in measurement system. [4]
- b) What is digital storage oscilloscope? Draw it's block diagram. [4]
- c) With suitable example, explain voltage and current setting of CVCC Power supply. [4]

P.T.O.

Q3) Answer Any Two of the following:

- a) Draw the neat diagram of Dc Voltmeter and explain its working in detail. [4]
- b) What is signal generator? state its specifications. [4]
- c) Explain with block diagram DC to DC converter. [4]

Q4) Answer All of the following:

- a) Draw and explain block diagram of DFM and give its modes of operation. [6]
- b) Explain working of function generator with block diagram. [6]

OR

- a) Calculate the percentage load regulation for power supply if $V_{ML} = 5V$ and $V_{FL} = 4.95V$ and state ideal values for load regulation. [4]
- b) Design multirange voltmeter for range $v = 0$ to 10 volt and $v = 0$ to 50 volt. when internal resistance $R_m = 50 \Omega$ full scale deflection current 1mA. [4]
- c) Calculate percentage duty cycle of square wave having [4]
 - i) T_{ON} time 0.5 m sec and T_{OFF} time 0.7 m sec.
 - ii) $T_{ON} = T_{OFF}$ time.

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Neat and labelled diagrams must be drawn wherever necessary.
- 3) Figures to the right indicate full marks.

Q1) Answer all of the following:

- a) Define baud rate. [1]
- b) State the role of pre-emphasis in F.M. [1]
- c) Define sensitivity of a radio receiver. [1]
- d) What is the role of hybrid in basic telephone hand set. [1]
- e) “In FM, band width is relatively larger than an equivalent AM signal”. Comment. [2]
- f) “Walky-talky is half duplex two way communication”. Comment. [2]
- g) Compute the noise temperature if the noise factor is 1.5. [2]
- h) If a superheterodyne receiver uses IF of 455 KHz for receiving frequency of 2000 KHz. What is the frequency of local oscillator? [2]

Q2) Attempt any two of the following.

- a) Distinguish between pulsed and DTMF dialing. [4]
- b) Describe the working of single tuned discriminator. What are its draw backs. [4]
- c) Explain the principle of heterodyne and draw a block diagram of super heterodyne AM receiver. [4]

P.T.O.

Q3) Attempt any two of the following:

- a) Explain with block diagram basic communication system. [4]
- b) Compare serial and parallel communication system. [4]
- c) Explain the concept of TDM and FDM. [4]

Q4) Attempt all of the following:

- a) Show that in AM
 - i) Two side bands are generated and draw frequency spectrum of AM.
 - ii) $P_c = \frac{2}{3} P_T$ [6]
- b) Explain the concept of ASK, FSK and PSK. [6]

OR

- a) A 50Ω resistor operates at $29^\circ C$. How much noise voltage it provides to a matched load over the bandwidth of 6MHz. [4]
- b) Determine the percentage modulation of an FM wave with a frequency deviation of 15kHz for
 - i) FM broadcast.
 - ii) For TV broadcast. [4]
- c) Calculate the power in each sideband if carrier power is 500 W and modulation index is 70%. [4]

Q1) a) Attempt any one of the following in about 100 words. [5]

- i) What is the significance of the little box that Rosemary Fell wanted to buy?
- ii) How did the narrator react to the changes made to his features in the photograph?

b) Attempt any one of the following in about 100 words. [5]

- i) Draw a character sketch of Rosemary Fell.
- ii) Do you think the narrator refers to the photographer's changes as his brutal work?

Q2) a) Attempt any one of the following in about 100 words. [5]

- i) How are the daffodils depicted by Wordsworth?
- ii) How does the poem 'Ozymandias' portray the idea that human life and power is temporary?

b) Attempt any one of the following in about 100 words. [5]

- i) What kind of advice does the poem 'If' convey for any good life?.
- ii) Describe the emotion that still remains on the face of the sculpture in the poem 'Ozymandias'.

P.T.O.

Q3) Attempt any two of the following:

[10]

- a) Write a short paragraph of about 100 words on ‘ My views on College life’.
- b) You have applied for a bank loan to study abroad and have been asked to attend an interview. Anticipate any five questions that you could be asked and write down your responses to them.
- c) Aniket, Archana, Rakesh and Amit are asked to have a group discussion on the topic ‘Are Indian films losing their charm’? Write a transcript of a group discussion using the following points:
don’t believe that, completely agree, see your point, it’s true, I’m afraid like to add, inclined to agree, make a point, to summarize, think that.
- d) Prepare five slides of 20 words each for a power point presentation on one of the topics from your textbook.

Q4) Attempt any two of the following:

[10]

- a) Write an essay on the impact of GST on Indian Economy.
- b) Write a review of your favorite television serial.
- c) Write a report of two short paragraphs on new superfast train from Ahamadabad to Mumbai.
- d) Summarize the following paragraph-

Science affects the average man and woman in two ways already. He or she benefits by its applications, driving a motor car or omnibus instead of a house drawn vehicle, being treated for disease by a doctor or surgeon rather than witch, and being killed with an automatic pistol or a shell in place of a dagger or a battle-axe. It also affects his or her opinions. Almost everyone believes that the earth is round, and the heavens nearly empty, instead of solid. And we are beginning to believe in our animal ancestry and the possibility or vast improvements in human nature by biological methods.

[10]

Punyashlok Ahilyadevi was born at Chaundi in Maharashtra in 1725. She was a daughter of Manakoji Shinde Patil. He was a vatandar. She was very pretty and very impressive in her childhood. Everyone was impressed instantly by her personality. The story of her wedding is very interesting. She became the daughter-in-law of the Subhedar of Malawa, Malharrao Holkar. Malharrao was very brave and gallant. He had a son, Khanderao. Khanderao was good for nothing. He was addicted and loved a life of luxury. He was not interested in the administration of his kingdom. Malharrao was very sad and worried for his useless son. He worried for his kingdom. He wanted it to prosper. Apparently Khanderao was not to fulfill his wish, Malharrao felt. He thought if Khanderao gets a good wife she would take care of the kingdom. He was always thinking about it.

Once he was travelling to take account of his subjects (people). Bhanoji was with him. They were riding on horsebacks. They saw a temple by a river. Malharrao wanted to rest for a while in that temple. He went with his four Soldiers and Dhanoji to the temple. The atmosphere in the temple was very holy. The sound of Jay Shiv Shambhu filled the temple. It was Lord Shankar's temple. Malharrao sat on a bench outside the temple a very impressive girl came to the temple. Malharrao was struck with her personality. He thought, "one should have such a daughter-in-law". The girl entered the temple, Malharrao looked at her very carefully. Dhanoji understood his thoughts. He said, " Maharaj, the girl is very impressive". Malharrao said, " As if Goddess Gauri has come to the temple!" Dhanoji said, "Chote Sarkar should get such a bride". "You stole words from my lips, " said Malharrao.

P.T.O.

नीती जेवढी धर्मनिरपेक्ष तेवढेच विज्ञानही धर्मनिरपेक्ष आहे. त्याहीपुढे जाऊन सगळे ज्ञानच धर्मनिरपेक्ष किंवा सेक्युलर आहे असे म्हणता येईल. धर्म, वंश, जात, भाषा किंवा आताच्या प्रादेशिक चौकटीत वाढलेल्या संस्कृती यांसारख्या जन्मदत्त निष्ठांपैकी कोणत्याही निष्ठेला ज्ञान-विज्ञानाचा आणि नीति-मूल्यांचा येत्या काळातील वेग आणि विजय रोखता येणार नाही. जन्मदत्त निष्ठांच्या चौकटी मजबूत असण्याच्या काळातही त्यांना तेंव्हाही जमले नाही. ज्या काळात या चौकटींच्या मागे समूहमन आणि त्या मनामागे श्रधांची बळकटी उभी होती त्या काळात जर त्या श्रधा नव्या जीवनमूल्यांना थोपवू शकल्या नसतील तर आताच्या स्वातंत्र्य, समता, बंधुता आणि सर्वस्वी व्यक्तिकेंद्री मानसिकतेच्या युगात त्यांना ते जमणे अशक्यही आहे. नव्या मन्वंतराला सामान्य माणसांनी घडविलेल्या कायद्यांचा, घटनांचा आणि लोकशाही व्यवस्थांचा भक्कम आधार आहे आणि तो जुन्या जन्मदत्त निष्ठांची मान्यता व बळकटी काढून घेणारा आहे.

आताचा मानवी मूल्यांच्या दिशेने होत असलेला प्रवास केवळ समूहगततेकडून व्यक्तिगततेकडे एवढाच मर्यादित नाही. तो धर्मश्रेष्ठेकडून धर्मनिरपेक्षतेकडे, वंशनिष्ठेकडून मानवी ऐक्याकडे आणि खन्या अर्थाने होणाऱ्या माणसांच्या मुक्तीच्या दिशेने होणार आहे. पूर्वीच्या संरक्षक चौकटींचे जाचकपण व्यक्तीएवढेच समूहांनाही जाणवू लागले आहे. या चौकटींचे अनैसर्गिक असणे आणि तरीही त्यांचे टिकून राहणे याच गोष्टींना आताच्या खन्या समस्यांचे स्वरूप आले आहे.

वयात आलेल्या स्त्रीपुरुषांवर कोणतेही बंधन, अगदी लैंगिक स्वातंत्र्या-विषयीचा निर्बंधही आता कोणाला घालता येणार नाही. तसे त्यांच्या आई-वडिलांएवढेच जातीधर्मांनाही करता येणार नाही. जगभरातील प्रगत देश एके काळी निषिद्ध मानलेल्या समलिंगी विवाहांना मान्यता देऊ लागले आहेत. समूहाने दिलेले सतीसारखे, केशवपनासारखे किंवा आताच्या खाप पंचायतींनी दिलेल्या प्रतिगामी निवाड्यांसारखे निर्णय आताच्या व्यवस्थेला नुसते अमान्यच नाहीत तर तीत दंडनीय अपराधही ठरणारे आहेत.

विज्ञानाने जगाच्या उत्पत्तीचा शोध सुरु केला आहे. स्वित्झर्लंड आणि फ्रान्सच्या सीमेवर भूपृष्ठाखाली कित्येक मीटर खोल, अठरा मैल लांबीचे व तीन मीटर व्यासाचे प्रचंड गोलाकार रिंगण त्यासाठी तयार केले आहे. या रिंगणात दर सेकंदाला हजारो किलोमिटर वेगाने प्रवास करणारे इलेक्ट्रान आणि प्रोटॉनचे सूक्ष्म कण सोडून त्यांची टक्कर घडवून आणली जात आहे. अशा पहिल्याच टक्करीने घडविलेल्या महास्फोटात (बिंग बँग) नवे जडद्रव्य (मॅटर) निर्माण झाल्याचे वैज्ञानिकांना आढळले आहे. जडद्रव्यापासून चेतन (याला त्यांनी सध्या दिलेले नाव आहे, अन्टीमॅटर) वेगळे करण्याचा आणि जडचेतन विश्वाची निर्मितीप्रक्रिया समजून घेण्याचा हा प्रयत्न आहे. (390 शब्द)

प्रश्न 2) खालीलपैकी कोणत्याही दोन प्रश्नांची उत्तरे लिहा. [15]

- अ) ‘सुशिक्षितांची अंधश्रद्धा’ या विषयावर वर्तमानपत्रासाठी दोनशे शब्दांत लेख लिहा.
- ब) ‘वाढती महागाई’ या विषयावर आकाशवाणीसाठी दोनशे शब्दांत भाषणसंहिता तयार करा.
- क) ‘परीक्षा व ताण-तणाव’ या विषयावर मानसोपचार तंजांची दूरदर्शनसाठी घेतलेली 5 मिनिटांची मुलाखत तयार करा.

प्रश्न 3) खालील पारिभाषिक संज्ञाना मराठीतील पर्यायी पारिभाषिक संज्ञा लिहा. (कोणतेही पाच)[5]

- i) Transport
- ii) Merit
- iii) Virus
- iv) Research
- v) Radiology
- vi) Square
- vii) Fungal
- viii) Solar energy
- ix) Director
- x) Laboratory

BIOTECHNOLOGY

VOC. Biotech-221- Plant and Animal Tissue Culture
(2013 Pattern) (Semester-II) (paper I)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) All questions carry equal marks.

Q1) Answer each of the following in 1-2 lines [10]

- a) What are growth hormones? state their role in PTC.
- b) Define: Callus culture.
- c) Enlist different macro nutrients in MS medium.
- d) State the role of 70% alcohol in PTC.
- e) What is embryo culture? Enlist important steps involved in embryo culture.
- f) Define: Primary cell culture.
- g) State the role of trypsin in ATC.
- h) Name any two important media used in ATC.
- i) What are stem cells?
- j) Give any two important methods of cell Separation.

Q2) Write short notes on any two of the following. [10]

- a) Trypsinisation in ATC.
- b) Protoplast culture.
- c) Cell banks.

P.T.O.

Q3) Answer any two of the following. [10]

- a) What is cell line? Explain any two methods of cell line characterisation.
- b) Importance of Aspetic techniques in PTC.
- c) 'Applications of PTC in plant propagation: Explain the importance.

Q4) What is organ culture? Explain various methods of organ culture with suitable diagram. [10]

OR

Explain various stages of micropropagation in PTC.

INDUSTRIAL CHEMISTRY (Vocational)

221: Unit Processes in Organic Chemical Industries

(2013 - Pattern) (Semester - II) (paper I)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat diagrams wherever necessary.

Q1) Write balanced chemical equations with necessary conditions for the following Synthesis. [16]

- a) Benzene - Dodecyl benzene.
- b) Cellulose - Cellulose acetate.
- c) Toluene - Benzoic acid.
- d) Benzene - Nitrobenzene.
- e) Acetic acid - Chloroacetic acid.
- f) Chlorobenzene - Aniline
- g) Ethyl benzene - Styrene.
- h) Benzene - Chlorobenzene.

Q2) Attempt any two of the following. [8]

- a) Explain Friedel - Crafts acylation.
- b) How is acetylene obtained from vinyl ester?
- c) Describe catalytic hydrogenation.

Q3) Answer any two of the following.

[8]

- a) Write a note on Ozonolysis.
- b) What is Oxidation? Describe the role of KMn O₄ as an oxidising agent.
- c) Discuss types of esterification processes.

Q4) What is reduction? Define reducing agent. Describe two example of reduction using a metal and acid. **[8]**

OR

What is sulphonation? How is sulphonation of benzene carried out? Explain with the mechanism involved.

PHOTOGRAPHY AND AUDIO-VISUAL PRODUCTION -I

Colour Photography and Digital Photography
(2013 Pattern) (Semester-II) (Paper - III)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Draw neat labeled diagrams wherever necessary.
- 3) Figures to the right indicate full marks.

Q1) Answer the following in short. [16]

- a) Why is white balance important in digital photography?
- b) Which tool in image processing software is used for selecting a specific area or colour?
- c) Explain two important features of a CCD sensor.
- d) What is dynamic range of a digital sensor?
- e) Draw a histogram of a properly exposed image. Discuss the diagram you have drawn.
- f) Explain the source of ‘noise’ in a digital sensor.
- g) What is ‘crop factor?’ How does it affect the image qualities?
- h) How is ‘18% grey’ important for a photographer?

Q2) Attempt any two of the following. [8]

- a) Draw a suitable diagram and explain the ‘luminosity curve’ of a normal human eye.
- b) Explain how the black body radiation curve is useful in defining the colour temperature of a light source.
- c) Describe the world without colours.

P.T.O.

Q3) Write short notes on any two of the following. [8]

- a) Use of filters in photography.
- b) Psychological impact of colours.
- c) Use of layer mask in image processing.

Q4) Attempt any one of the following. [8]

- a) Draw a diagram and discuss the spectral response of a normal human eye. Hence explain how human beings see colours.
- b) Draw a suitable diagram and explain the construction of a typical sensor used in a digital camera. Explain the purpose of each ‘layer’ and component of the sensor. Discuss the sequence of events taking place when the sensor is exposed to a ‘scene’.

ELECTRONIC EQUIPMENT MAINTENANCE

VOC- EEM - 221: Troubleshooting Electronic Equipment - B
(2013 Pattern) (Semester-II) (Paper - I)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

Q1) Answer the following.

- a) Give name of any two SMD packages. [1]
- b) State the three states of tri - state logic IC. [1]
- c) State the precaution for handling digital ICS. [1]
- d) State the advantage of SMD over through hole type device. [1]
- e) State the type of regulators. [2]
- f) State the procedure for testing counter ICS. [2]
- g) State the advantages of fixed three pin regulator. [2]
- h) State the features of surface mount technology. [2]

Q2) Answer any two of the following.

- a) Explain the procedure of troubleshooting high voltage power supply.[4]
- b) Discuss the steps in repairing SMPS. [4]
- c) Write a note on ‘Fault Diagnos chart’ of oscilloscope. [4]

Q3) Answer any two of the following.

- a) Explain with block diagram the working of cordless telephone. [4]
- b) Discuss the troubleshooting procedure of cordless telephone. [4]
- c) Discuss the typical faults and their troubleshooting in Digital still camera.[4]

Q4) Answer the following.

- a) Write a short note on ‘Mobile phone’. [6]
- b) Explain the faults and their remedies in Mobile phone. [6]

OR

Q4) Answer the following.

- a) Discuss the procedure of testing decoder. [4]
- b) Explain with neat diagram the operation of logic probe and pulser. [4]
- c) Explain with neat diagram the working of logic comparator. [4]

Time : 2 hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) *All questions are compulsory.*
- 2) *Figures to the right indicate full marks.*

Q1) a) Attempt the following: [4 × 1 = 4]

- i) What is a MIDI?
- ii) List various controllers that are located on the motherboard.
- iii) State any two features of Android.
- iv) List various input and output devices available for modern PC.

b) Attempt the following: [4 × 2 = 8]

- i) What is Multimedia PC? State minimum requirement for it?
- ii) What is function of display adapter?
- iii) What is OS? List various OS available.
- iv) What is wi-fi? State applications of wi-fi.

Q2) Attempt any two of the following: [2 × 4 = 8]

- a) What is BIOS? Explain the important functions of BIOS.
- b) Write a note on storage devices and their techniques.
- c) Explain the concept of speech recognition in brief

P.T.O.

Q3) Attempt any two of the following: **[$2 \times 4 = 8$]**

- a) What is Green PC? Explain the concept of thick and thin configuration.
- b) What are the different types of Printers? Explain in brief the advantages and disadvantage of any one.
- c) What is Bluetooth? Explain features and application of Bluetooth.

Q4) Attempt any two of the following: **[$2 \times 6 = 12$]**

- a) What is function of ADD ON cards? List various ADD ON cards available for interface. Explain in brief features of any one.
- b) State the advantages of serial communication system. Explain in brief asynchronous and synchronous communication protocol.
- c) What is Network? State advantages of Network. Explain features of LAN.

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat labelled diagrams wherever necessary.

Q1) Attempt the following: [10]

- a) What is sexual reproduction?
- b) Define self incompatibility.
- c) Give the types of hybridization.
- d) Write any two applications of population improvement.
- e) Give the diagrammatic representation for classifying the vegetable crops based on growing season in vegetable crops.
- f) What is isolation distance for foundation seed production in OKra?
- g) Which type of nursery bed is required for growing onion seedlings?
- h) Define seed drying.
- i) What is CMS?
- j) Write any two objectives of vegetable seed production.

Q2) Attempt any two of the following: [10]

- a) Explain any two vegetative methods of reproduction in vegetable crops.
- b) Discuss genetic male sterility in detail.
- c) Write the objectives of hybridization techniques in vegetable crops.

P.T.O.

Q3) Write notes on any two. [10]

- a) Bulk method.
- b) Progeny selection.
- c) Classification of vegetable crops based on plant parts used for consumption.

Q4) Answer any one of the following. [10]

- a) Give an account of seed production in okra with reference to kind requirement, isolation, nursery management, cultural practices, roughing, plant protection, harvesting, seed extraction, drying and storage.

OR

- b) Give an account of seed production in bitter gourd with reference to land requirement, isolation, nursery management cultural practices, roughing, plant protection, harvesting, seed extraction, drying and storage.

INDUSTRIAL MICROBIOLOGY (Vocational)

**VOC- IND-MIC- 221: Fermentation Processes and Downstream
Processing**

(2013 Pattern) (Semester-II) (Paper - I)

Time : 2 Hours]

[Max. Marks :40

Instructions to the candidates :

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) All questions carry equal marks.
- 4) Draw neat labeled diagrams wherever necessary.
- 5) Use of scientific calculators is allowed.

Q1) Answer each sub-question in one or two lines; Fill in the blanks; State whether the statement is true or false. **[10]**

- a) Define Downstream Processing.
- b) The cell disruption is important step in isolation of extracellular enzyme.(True/False).
- c) Distillation can be used to separate a soluble solid from a solution.(True/False).
- d) Write structure of citric acid.
- e) Name any two microbes used as bioinoculant with respect to their plant growth promoting feature.
- f) The Production of L-glutamic acid by C. glutamicum is maximal at a critical ____ concentration, which is suboptimal for growth.
- g) State any two primary metabolites produced by microbes and obtained by fermentation process.
- h) Name any two chemicals which are used in precipitation of fermentation product.
- i) What is rennet?
- j) Disadvantages of extraction process.

Q2) Answer any two of the following. [10]

- a) Write flow chart for glutamate production.
- b) Explain Vitamin B12 production.
- c) How Chromatography is used in product recovery?

Q3) Write short notes on any two of the following. [10]

- a) Vinegar production.
- b) Precipitation method in fermentation.
- c) Product polishing.

Q4) Answer any one of the following. [10]

- a) Discuss a typical process of bioinoculant production using flow chart. How is quality control employed in bioinoculant production?
- b) Describe the filtration as product recovery process in fermentation.

PHOTOGRAPHY AND AUDIO-VISUAL PRODUCTION

Principles & Applications of Analog and Digital Communications
(Semester-II) (Paper - IV)

Time : 2 Hours]

[Max. Marks : 40

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Draw neat and labeled diagrams wherever necessary.
- 3) Figures to the right indicate full marks.

Q1) Attempt the following questions.

- a) State whether the following statements are TRUE or FALSE. Justify your answers. [2]
 - i) Examples of transceivers include televisions, fax machines, cellular telephones, and computer modems.
 - ii) Most of the signals and waveforms that we discuss and analyze are expressed in the time domain whereas in telecommunication we discuss and analyze signals in the frequency domain as well.
- b) Comment on the following statements. [4]
 - i) mQAM and mPSK are normally used in old days MODEMs for high data transfer rate, where m denotes number of symbols.
 - ii) According to fourier analysis, complex signals and distorted sine waves are made up of a fundamental sine wave and numerous harmonic signals.
- c) Attempt the following. [6]
 - i) For a PAM transmission of a voice signal with $f_m = 3 \text{ kHz}$, calculate the transmission bandwidth B_T , if the width of each pulse, $\tau = 0.1 T_s$ and the sampling frequency $f_s = 8 \text{ kHz}$.
 - ii) Give range of frequency and bandwidth for
 - a) Voice signal for telephony.
 - b) Music signal.
 - c) TV signal (Picture).
 - d) Digital data using MODEM (old system).

P.T.O.

Q2) Attempt ANY TWO of the following. [8]

- a) Write short note on inter-symbol interference.
 - b) Write short note on CDMA.
 - c) Write note on pulse and DTMF dialing.

Q3) Attempt ANY TWO of the following. [8]

- a) Compare frequency modulation and amplitude modulation techniques in communication system. Discuss indirect method of generating FM.
 - b) Explain the function of modem at transmitting end and receiving end.
 - c) Explain clearly difference between instantaneous, natural and flattop samples in PAM system.

Q4) Attempt ANY TWO of the following. [12]

- a) Find the Nyquist rate and Nyquist interval for the signal $X(t) = 5\cos(1000\pi t)\cos(4000\pi t)$.
 - b) The Output voltage of transmitter is given by, $50(1+0.6 \sin 628t) \sin(3.14 \times 10^7 t)$, this voltage is fed to a load of 600Ω . Determine Carrier frequency, Modulating frequency, Carrier power and Mean power output.
 - c) A 20 MHz carrier is modulated by a 400 Hz modulating signal. The carrier voltage is 5V and the maximum deviation is 10kHz. Write down the mathematical expression for the FM and PM waves. If the modulating frequency is increased to 2 kHz keeping everything else constant write down the expression for the FM and PM waves.

OR

Q4) Attempt ANY TWO of the following. [12]

- a) Explain PCM
 - b) Explain super heterodyne AM receiver with a neat block diagram.
 - c) Explain PAM -TDM.

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of non programmable scientific calculator is allowed.

Q1) Attempt any five of the following: [10]

- a) Three approximate values of the number $\frac{2}{3}$ are given as 0.3, 0.33 and 0.34. Which of these three is the best approximation?
- b) Round-off the following numbers to four significant figures.
3.3465827, 15.235387, 5.37582, 0.00457328
- c) Derive Newton-Raphson formula to find square root of a given number C.
- d) State newton's formula for general interpolation with divided difference.
- e) Prove that $\nabla \equiv 1 - E^{-1}$.
- f) Evaluate $\left(\frac{\Delta}{E}\right)^2 x^3$ where interval of differencing being 1.
- g) Given that $\frac{dy}{dx} = -2y$, $y(0)=1$. Find $y(0.2)$ by Euler's method. (Take $h=0.2$. Perform one iteration).

P.T.O.

Q2) Attempt any Two of the following:

[10]

- Prove that the n^{th} forward difference of a polynomial of degree n in x is constant when the values of independent variable are at equal intervals.
- Find the root of the equation $x^2 - 2x - 1 = 0$ between $x = 1$ and $x = 3$ by using false position method.
(Perform 4 iterations)
- Find the number of students who obtained less than 45 marks from the following data.

Marks	30-40	40-50	50-60	60-70	70-80
Number of students	31	42	51	35	31

Q3) Attempt any two of the following:

[10]

- State and prove newton's formula for backward interpolation.
- Given that $\log 100=2$, $\log 101=2.0043$, $\log 103=2.0128$, $\log 104=2.0170$. Find $\log 102$.
- Find the best linear fit to the following data points:

x	1	2	3	4	5
y	3	4	5	6	8

Q4) Attempt any One of the following:

[10]

- i) State general quadrature formula and hence drive Trapezoidal rule for numerical integration.
ii) Given that $\frac{dy}{dx} = x + y$, $y(1)=0$, obtain Taylor's series for $y(x)$ and compute $y(1.2)$ correct upto four decimal places.
- i) Evaluate $\int_1^3 \frac{1}{x} dx$ by simpson's $\frac{1}{3}$ rd rule.
Take $h=0.25$.
ii) By using Runge-kutta method of fourth order find $y(1)$ if
$$\frac{dy}{dx} = \frac{x^2 + y^2}{10}, y(0)=1$$
 Take $h=1$

maximumMarks : 40]

[Time : 2 Hours

Instructions to candidates :

- 1) Attempt all questions.
- 2) Figures to the left indicate full marks.

نوٹ:- تمام سوالات کے جوابات لازمی ہیں۔

خوش خطی کا لحاظ رکھیں۔

سوال نمبر ۱:- مشنی پر یہم چند کی افسانہ نگاری کا مختصر جائزہ لیجئے۔

یا

مشنی پر یہم چند کی حالات زندگی بیان کیجئے۔

سوال نمبر ۲:- انسانہ کے آغاز پر روشنی ڈالیئے۔

یا

افسانے کے اجزاء ترکیبی بتائیئے۔

سوال نمبر ۳:- کسی دو کرداروں کا تجزیہ کیجئے۔

۱۔ شری کنٹھ ۲۔ آندی ۳۔ عباسی ۴۔ الوبی دین

سوال نمبر ۲:- یہ پڑے گئے سائنسی اصطلاحات میں سے کوئی اس کا اردو میں ترجمہ کجئے۔

- [10] 1. Conduction 2. Boiling Point 3. Irregular reflection
- 4. Nuclear force 5. Solar Eclips 6. Biomass
- 7. Radiation 8. Micro organism 9. Density
- 10. Atomic weight 11. pesticide 12. Voltage
- 13. Components
