**[5467]-101**

**MCM (I Sem.) EXAMINATION, 2018**

**101 : FUNDAMENTALS OF INFORMATION TECHNOLOGY**

**(2012 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Question No. 1 is compulsory.

(ii) Solve any *four* questions from the remaining.

(iii) Figures to the right indicate full marks.

**1.** Define Computer. Discuss various characteristics of Computer. [10]

**2.** (A) Solve :

(a)  $(ABC)_{16} = (?)_2$

(b)  $(10011010)_2 = (?)_{10}$

(c)  $(456)_8 = (?)_{10}$

(d)  $(98)_{10} = (?)_2$

(B) Give difference between Primary and Secondary memory. [7]

**3.** (A) Define Computer Network and give difference between LAN and WAN. [8]

(B) Discuss various functions of Operating System. [7]

P.T.O.

4. (A) Explain any *four* Input Devices. [8]  
(B) Discuss various types of computer languages. [7]
5. (A) What is meant by Network Topology ? Explain any *three* topologies with neat labelled diagram. [8]  
(B) Differentiate between Compiler, Assembler and Interpreter. [7]
6. (A) Explain Batch Processing system in detail. [8]  
(B) What is a Pen Drive ? Explain with diagram. [7]
7. (A) Discuss various types of Computers. [8]  
(B) Explain the terms Bit, Byte, KB, MB, RAM, ROM and PROM. [7]

**[5467]-102**

**M.C.M. (First Semester) EXAMINATION, 2018**

**102 : C-PROGRAMMING AND DATA STRUCTURE**

**(2012 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Q. No. 1 is compulsory.

(ii) Solve any *five* questions from the remaining.

(iii) Figures to the right indicate full marks.

1. (A) What would be the output of the following program segments ? Explain : [12]

```
(a) void main( ){  
    int x[25];  
    x[0]=100;  
    x[24]=400;  
    printf("\n%d\t%d", *x, *(x+24) + *(x+0));  
}
```

```
(b) void main( ){  
    char *p;  
    printf("%d%d", sizeof(*p), sizeof(p));  
}
```

P.T.O.

```

(c) void main( ) {
    int i=3;
    switch(i) {
    default : printf("zero");
    case 1 : printf("one");
             break;
    case 2 : printf("two");
             break;
    case 3 : printf("three");
             break
            }
    }

```

```

(d) void main( ){
    int x=10, y=-20;
    x=! x && !y;
    y=!x| |y;
    printf("x=%d, y=%d", x, y);
}

```

(B) Write short notes on (any *two*) : [8]

(i) Linked list

(ii) Queue

(iii) Dynamic memory allocation.

2. Write a C program to display the following pattern using nested loops : [10]

```

1 0 0 0 0
  1 0 0 0
    1 0 0
      1 0
        1

```

3. Write a C program to accept a decimal number and convert it to octal equivalent number. [10]
4. Write a C function that accepts a string as argument and returns number of vowels in the string. [10]
5. Write a C program that assigns a  $5 \times 5$  matrix with the following values using for loops. Elements in the first row or first column or last row or last column = +1 and the rest of the elements should be set to 0. Print the matrix row-wise. [10]
6. Write a program to read the source file and find number of occurrences of given character in the file. Accept source file name and character through command line arguments. [10]
7. Create a structure of bank account holder as account number, name, balance. Write a program to display the name of accountholder with : [10]
  - (i) Maximum balance
  - (ii) Minimum balance.

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :-** (i) Question Nos. 1 and 6 are compulsory.

(ii) Solve any *three* from Q. Nos. 2, 3, 4 and 5.

1. The ABC Hospital Management has decided to computerised their hospital i.e. Hospital Management for IPD and OPD System. There are Doctors who are full time as well as residential and visiting with various specialisations. Consulting doctors visited hospital at different hours of the week. Charges for the same can vary from doctor to doctor depending on their experience. Patients are admitted to the hospital for various reasons according to the category. Room Charges are also vary according to the category of room. In the Hospital Employee are recorded the different information time to time and maintain, the different records such as Patient Records, Doctors Records, and Bill Records etc.

(a) Draw DFD diagram [10]

(b) File Layout [8]

(c) Report generation i.e. Output Report Forms (any *two*) [7]

2. (a) Explain the Functional and Non-functional Requirements. [5]

(b) Explain the role of System Analyst in SDLC. [5]

P.T.O.

- 3.** Considering Gas booking for refilling and delivery problem at the different agencies. company wants to develop and implement the following innovative steps in proposed system :
- (1) Customers have to register their mobile number with agency.
  - (2) Customer can book the cylinder for refilling from their registered mobile.
  - (3) While booking, customers have to dial a specific number for booking and agency phone number in a sequence.
  - (4) After doing above step no. 3, customers get updates about delivery date and time.
  - (5) One day before the delivery, customer get precise schedule about delivery on customer's mobile.
  - (6) Next Day of delivery, customer get receipt details against payment done by the customer during delivery of cylinder. These details are also available on customer's mobile.

Draw use case diagram for the above case. [10]

- 4.** (a) Explain various phases of RUP. [5]  
(b) Explain Function Decomposition. [5]
- 5.** Describe input and output design with suitable example. [10]
- 6.** Write short notes on (any *three*) : [15]
- (a) Decision Tree and Decision Table
  - (b) SSAD and OOAD
  - (c) Pseudo Code and Structure English
  - (d) Data Abstraction and Data Encapsulation

**M.C.M. (I Semester) EXAMINATION, 2018**

**104 : DATABASE MANAGEMENT SYSTEM (DBMS)**

**(2012 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Question No. 1 is compulsory.

(ii) Solve any *five* from the remaining.

(iii) Figures to the right indicate full marks.

1. (a) Punjab University Research Group publishes an Analysis of all journal papers to Physics, Chemistry and Mathematics. Each paper may have more than one author and may appear in only one Journal. Journals are identified by publisher details, titles, volumes and issue number. One issue contains many papers of many subjects. Each paper contains series of references to their papers. Authors contribute to many papers appearing in varieties of Journals.

Draw Entity-Relationship Diagram and convert it into Relational Database (tables). [10]

P.T.O.

(b) Magnum Electric Company is a distributor of electricity in a small town having about 5000 consumers. The consumers are divided into three categories *i.e.*, Agriculture, Commercial, Domestic for whom different rates per unit are chargeable according to a slabwise table. There is also minimum charge for each category. The billing is made according to reading which was reported by meter readers working with the company. The bills are paid by the consumers at a central collection center of the company.

Normalise the above case upto 3NF. [10]

2. Explain different characteristics of DBMS. [10]
3. (a) What is Transaction ? Explain Acid properties of Transaction. [5]  
(b) Explain states of Transaction with neat diagram. [5]
4. Explain any *five* Fundamental Relational Algebra Operators with example. [10]
5. Explain various concurrency control techniques. [10]
6. (a) Explain failure classification. [5]  
(b) What are Database security issues ? [5]
7. Write short notes on (any *two*) : [10]
  - (a) Application of Data Mining
  - (b) Database Users
  - (c) Cardinality Ratio.

**[5467]-11**

**M.C.M. (First Semester) EXAMINATION, 2018**

**C-PROGRAMMING**

**(2008 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Q. No. 1 is compulsory.

(ii) Solve any *five* questions from the remaining.

1. (A) Trace the output and justify the answer. Assume suitable header files : [12]

(a) void main( )

```
{
    int a=5, b, c;
    b=a=15;
    c=a<15;
    printf("a=%d, b=%d, c=%d", a, b, c);
}
```

(b) void main( )

```
{
    char suit=3;
    switch(suit)
    {
    case 1 : printf("Diamond\n");
    case 2 : printf("spade\n");
    default : printf("Heart\n");
    }
    printf("\n I thought one wears a suit");
}
```

P.T.O.

```

(c) void main( )
    {
        void disp(char*);
        disp("Hallo");
    }

void disp(char*s)
{
    if(*s)
        disp(s*1);
    putchar(*s);
}

(d) void main( )
    {
        int x;
        for(x=0; x<=5; x++)
        {
            switch(x)
            {
                case 2 : printf("A")
                        continue;
                case 3 : break;
                case 4 :
                case 5 : printf("BB");
                        break;
                default : printf("C");
            }
        }
    }

```

(B) Explain the following (any *two*) : [8]

(a) Data types in C

(b) Command line arguments

(c) Pointer.

2. Write a program to display the following pattern using nested loops : [10]

```
1
2 3
4 5 6
7 8 9 10
```

3. Write a program to accept two  $3 \times 3$  matrices and display the subtraction on the screen. [10]

4. Write a recursive function which receives a number and return the sum of digits of a number. [10]

5. Write a program to accept information of 50 students as rollno, name, mark1, mark2. Calculate total and percentage, store them in respective students. Display all the data in tabular format. [10]

6. Write a program to accept the file name from the user and display the number of digits present in the file. [10]
  
7. Write a program to accept 10 numbers and display the numbers by sorting them in ascending order. [10]

**MCM (II Sem.) EXAMINATION, 2018**  
**201 : DATA STRUCTURE AND ALGORITHM**  
**(2008 PATTERN)**

**Time : Three Hours****Maximum Marks : 70**

- N.B. :—** (i) All questions are compulsory  
(ii) State your assumptions clearly, if any.  
(iii) Write appropriate structure definitions wherever necessary  
(iv) Figures to the right indicate full marks.

1. (a) Evaluate the following postfix form :

$$ABC^*+DEF/-+$$

Where  $A = 4$ ,  $B = 5$ ,  $C = 6$ ,  $D = 32$ ,  $E = 9$ ,  $F = 3$ .

Show the contents of stack at each step in tabular form. [7]

*Or*

Evaluate the following prefix expression :

$$+-AB-/C+DEF$$

Where  $A = 9$ ,  $B = 5$ ,  $C = 2$ ,  $D = 4$ ,  $E = 8$ ,  $F = 1$ .

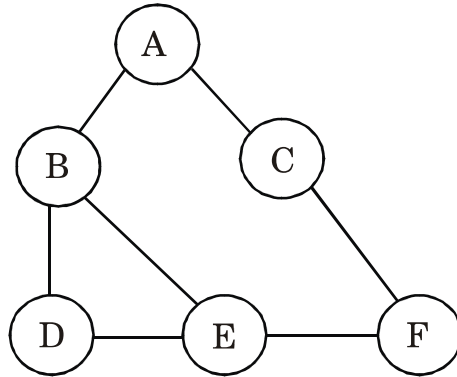

Show the contents of stack at each step in a tabular form.

- (b) Convert the following Infix form to Postfix form (any two) : [8]
- (i)  $((a+b)/c)*(d+(e-f)/g)$   
(ii)  $a+b-(c*(d+e)-f)$   
(iii)  $(a+b)*(c-d)/e$

2. Answer any *three* of the following : [15]
- (a) Write a function to push and pop the element from stack.
  - (b) Write a function to insert an element in a linear queue.
  - (c) Write a function to count non-leaf nodes of a Binary Search Tree.
  - (d) Write a function to search an element in Singly Linked List of integers.
3. Answer any *three* of the following : [15]
- (a) Consider a message :  
FACEBOOK  
Draw a Huffman tree for the message. What kind of tree is Huffman tree ?
  - (b) Sort the following numbers using bubble sort :  
25, 8, -4, 80, 56
  - (c) Consider declaration :  
`int a[6][7];`  
Compute row major and column major address of an element `a[3][4]` when base address is 300.
  - (d) Write a ANSI C code to find the sum of data fields stored in the different nodes of linear linked list of integers.
4. Answer any *three* of the following : [15]
- (a) Write a function for level order traversal of binary tree.
  - (b) Write a function to add node in Doubly Linked list.
  - (c) Write a function to display elements in circular queue.
  - (d) Write a function print mirror image of the Binary Search Tree.

5. Answer using the following graph :

- (i) Adjacency Matrix representation [3]
- (ii) Adjacency List representation [3]
- (iii) Generate output of DFS, when starting vertex is A [4]

**(2008 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Question No. 1 and Q. No. 7 are compulsory.

(ii) Solve any *four* from the rest.

**1. Find output of the following :** **[15]**

```
(a) a = [5, 4, 3, 2, 1]
    sum = 0
    a.each {|i| sum + = i}
    puts sum

(b) i = 0
    while (i < 50)
      i + = 1
      next if i % 2 != 0
      puts i
    end
```

P.T.O.

(c) `b = 1`  
`puts b * = 3 while b < 50`  
`puts b + = 2 until b < 50`  
`b`

(d) `print "Hello\n" while false`  
`begin`  
`print "Good Morning\n"`  
`end while false`

(e) `x = [10, 20, 30, 40, 50]`  
`sum = 0`  
`x.each {|i| sum +=i}`  
`puts sum`

2. Write a ruby program to print prime numbers between 100 to 200. [10]
3. Write a program that reads source file and copies file to the target file by replacing all the spaces with '\$'. [10]
4. Design a class student with instance variables (Roll no, Name, marks of 6 subjects). Write a method that to calculate percentage and print the details of the student whose percentage is more than 70. [10]
5. Write a program that checks the entered string is palindrome or not. [10]

6. Write a program to accept 10 students' name and display them in ascending order. [10]
7. Write short notes (any *three*) : [15]
- (a) Duck typing
  - (b) Inheritance and Polymorphism
  - (c) Exception handling
  - (d) Blocks and Iterators
  - (e) Classes and Modules.

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Question No. 1 is compulsory.

(ii) Answer any *five* from the remaining questions.

(iii) Mention assumptions made for solving case study.

**1. (a)** Draw class and use case diagram for the following : [15]

In ABC online book purchase system, customer can login, select the desired books by searching the author or by entering the subject of the book. From the list of books, the customer selects the book and put it into the cart. He can remove the book from the cart before final bill is generated. Once the bill is generated he has to pay using debit or credit card, online banking etc.

The new book arrivals are uploaded by website administrator.

**(b)** Explain aggregation and association with a suitable example. [5]

**2.** Explain various phases of RUP in detail. [10]

**3. (a)** Draw a sequence diagram for online Air ticket booking. [5]

**(b)** Compare between SSAD and OOAD. [5]

P.T.O.

4. Draw a state transition diagram for a fully automated washing machine. [10]
5. Explain with the help of an example Grady Booch methodology. [10]
6. Explain different approaches to identify classes. [10]
7. Write short notes on (any *two*) : [10]
  - (a) OOSE
  - (b) Antipattern
  - (c) Mapping Object to Relational Data Structure
  - (d) Testing Business Process.

**N.B. :—** (i) Question Nos. 1 and 6 are compulsory.

(ii) Solve any *three* from the remaining.

1. (a) Write PHP Code which accepts time and display Good morning, Good afternoon and Good evening. [10]  
(b) Explain Configuring Virtual Host in Apache Web Server. [10]
  
2. Write MySQL Commands for the following : 5×2=10
  - (a) Creating User
  - (b) Creating Table
  - (c) Granting Permissions
  - (d) Alter table
  - (e) Updating Data in Table.
  
3. Explain the following Linux Commands with example (any *five*) : [5×2=10]
  - (a) PID and PPID
  - (b) Sort
  - (c) Find
  - (d) Tar
  - (e) Kill
  - (f) Chmode.

P.T.O.

4. Explain GET, POST, SESSION and COOKIES variables in PHP. [10]
5. Explain constructor in PHP with the help of an example. [10]
6. Write short notes on (any *four*) : [4×5=20]
  - (a) Include and Require in PHP
  - (b) Process and in Linux
  - (c) Structure of linux file system
  - (d) Data Types in MYSQL

1. Solve any *two* cases :

[20]

***Case-1***

The ABC Hospital Management has decided to computerized their hospital i.e. Hospital Management for IPD and OPD System. There are Doctors who are full time, Resident and visiting with various specializations, Consulting doctors visiting hospital at different hours of the week. Charges for the same can vary from doctor to doctor depending on their experience. Patients are admitted to the hospital for various reasons according to the category. Room Charges are also very according to the category of room. In the Hospital Employee are recorded the different information time to time and mention the different records such as Patient Records, Doctors Records, Bill Records etc. as security manager suggest different access role and also suggest some access control, security control to maintain system security.

P.T.O.

### ***Case-2***

With continuing security concerns for airport operations, the protection of internal operational protocols of an international airport has become more critical than ever before. Therefore, the Information Security System (ISS) was developed for International Airport which can protect the critical information related to airport operations. The ISS was developed in consideration of information life cycle of airport workflow. As a result, it can securely protect the computer system at International Airport by :

- (1) Performing real-time encoding of the users who accessed the protected files and folders.
- (2) Limiting the user's capability to edit the protected documents.
- (3) Tracking transmitted files to the outside companies.
- (4) Blocking the user's access to portable storage devices, and
- (5) Inserting security water marks on the printed outputs.

With the implementation of the ISS, the real-time information system audit environment has been securely established at the International Airport Corporation

As System Analysis specify the threat and security for above Airport Company.

### ***Case-3***

Swyam Corporative Bank having multiple branches all over the Maharashtra. Customer can perform the transaction from any branch as well as through Internet. As Security Expert suggest some network threats also suggest security for protecting data from unauthorized access.

2. What is Fault Tolerance ? How fault recovers in Distributed System ? [10]
3. Explain cyber security with different type of physical threats. [10]
4. What is access control ? Define the role of access control in Cyber Security. [10]
5. Define E-Banking with its threats and protection policy. [10]
6. Write short notes on (any *four*) : [20]
  - (1) Network Attack
  - (2) Behavioral Biometric Techniques
  - (3) Incident Response Team
  - (4) Physical Security.
  - (5) Scripts Kiddies and Packaged Defense.

**MCM (II Semester) EXAMINATION, 2018**

**201 : BUSINESS APPLICATION AND ERP TOOL**

**(2012 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) *All* questions are compulsory.

(ii) Figures to the right indicate full marks.

1. (A) Define ERP ? Explain the importance of ERP with respect to manufacturing company. [10]

*Or*

(B) Explain post-implementation review of ERP package with respect to service industry. [10]

2. (A) Explain steps involved in customer order processing system with the help of context level DFD. Draw format of any three reports generated from the system. [10]

*Or*

(B) What do you mean by BOM ? Draw the layout of BOM ? [10]

3. (A) What is Product ? Explain the PLC with diagram. [10]

*Or*

(B) Explain FIFO and LIFO methods with examples. [10]

4. (A) Define Market Segments. Specify different market segments. Explain how different market segments boost sales.

P.T.O.

*Or*

- (B) Design a quotation for the following items. Consider you as sales manager of Arena Multimedia, Mumbai : [10]

Sr. No.	Particulars	Quantity
1	Laptop	3
2	Keyboard	6
3	Web camera	3
4	Printer	2
5	Speaker	5

5. (A) Explain the procedure to prepare Profit and Loss A/c along with its format for any small scale company who engaged in automobile sector. [10]

*Or*

- (B) What is Ratio Analysis ? Describe how the Financial Ratio Analysis supports Management to make decisions ? [10]

6. (A) What is Payroll ? Draw the layout of Pay Slip and explain all Income and Deduction heads. [10]

*Or*

- (B) Define recruitment. Explain the sources of Recruitment. [10]

7. (A) Explain barriers in ERP implementation in brief. [10]

*Or*

- (B) Write short notes on (any *two*) : [10]
- (a) Material Requisition
  - (b) E-Banking
  - (c) MRP.

**(2012 PATTERN)**

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Question Nos. 1 and 7 are compulsory.

(ii) Attempt any *three* from the remaining.

(iii) Figures to the right indicate full marks.

**1.** Consider the following table to solve the following queries (any *ten*): [20]

EMP (E\_id, Ename, Gender, Designation, Date\_of\_Joining)

PROJECT (P\_id, Project\_Name, Start\_date, End\_Date, Domain)

WORK (E\_id, P\_id, Status)

(i) Display all male employees who joined before '1-3-1990'.

(ii) Display list of Employees whose name begins with 'A' and ends with 'T'.

(iii) Display list of employees whose designation is 'Programmer'.

(iv) Display the project name which are 'Completed'.

P.T.O.

- (v) Display the name of project along with Employee name.
  - (vi) Display the name of project on 'Education' domain.
  - (vii) Display the name of project which started before '1-4-1996'.
  - (viii) Display the total no of projects completed by male and female employees.
  - (ix) Display the name of Employees who have worked on project "Inventory management."
  - (x) Display the name projects which were completed in less than two months duration.
  - (xi) Add one column "Project-cost" in PROJECT table.
  - (xii) Update the Designation of employee "Amit" as "System Analyst".
- 2.** Write a PL/SQL program to print an accepted string in reverse. [10]
- 3.** Write a DML trigger on PROJECT table to Accept End\_Date greater than Start\_date. [10]
- 4.** Write a cursor which will display the list of projects which were completed in less than two months time. [10]

**5.** Write differences between the following : [10]

- (a) Drop and Truncate
- (b) Primary key and Unique key
- (c) LTRIM and RTRIM
- (d) Ceiling and Floor.

**6.** Write short notes on (any *four*) : [20]

- (a) Set operator
- (b) Views in oracle
- (c) DML commands
- (d) Aggregate functions

**Time : Three Hours**

**Maximum Marks : 70**

**N.B. :—** (i) Question No. 1 is compulsory

(ii) Attempt any *five* questions from the remaining.

1. (A) Answer the following : [10]

(a) What is Grid Layout ?

(b) What is Garbage Collection ?

(c) List methods of RandomAccessFile class.

(d) What is Thread Priority ?

(B) Differentiate between : [10]

(a) Final and Static keyword

(b) Class and Interface.

2. Write java application to define book class containing BookId, Title, author, rate, number of copies. Define parameterized constructor. Define method that will calculate cost of books. Accept details of five books in array of object from user display details along with cost of all books. [10]

P.T.O.

3. Write Java Application to accept 10 float values in an array. Display sum and average of values. [10]
4. Write AWT application to display right scrolling banner. [10]
5. Why is java called object-oriented language ? Explain. [10]
6. Write program to accept file name in a text field. Take one Show button. Onclicking this Show button, file contents will be displayed in text area. Each word should be reversed. Eg. If file contents “ This is a Test File” it should display in text area as  
sihT sI a tseT eliF [10]
7. Write short notes on (any *two*) : [10]
  - (a) Exception Handling
  - (b) Access Modifiers
  - (c) Vector Class.
